

## Sonumaxx 2.4 Engineering Change May 2022

Due to manufacturing component changes during the last year, the charging circuitry in the Sonumaxx 2.4 transmitter and receivers have changed.

New codes have been allocated and descriptions have been adjusted to take into account the changes.

All new products now have V2 in the description.

Unfortunately, the new charging circuit is not compatible with the old charging circuit, which means that the new V2 products are not backwards compatible with the original older product.

Serial numbers of the new V2 systems start from **410800011840** for the headset version, and **411800015796** for the PR Version.

Please note; If you require an extra or replacement receiver for an original older system these will no longer be available to purchase. Any warranty Issues will be dealt with appropriately and will not affect any statutory rights.

Old Order Code	Old Description	New Order Code	New Description
230-450	Sonumaxx 2.4 Headset System	230-431	Sonumaxx 2.4 V2 Headset System
