TEST MODE

Press and hold ▲ / **TEST** button, strobe light flashing, shaker vibrating and buzzer sounding for 5 seconds and then stops.

LOW BATTERY ALERT

When the battery level becomes low, a low battery icon  will appear on the upper middle of the LCD. Replace batteries with new alkaline batteries.

Remark: frequent use of the vibration alarm will quickly shorten the battery life.

TROUBLE SHOOTING

If your clock displays irrelevant time or does not function properly, which may be caused by electro-static discharge or other interference, open the battery cover, take out the batteries and reinstall them by observing the correct +/- polarity. Your clock will be reset to default settings and you need to set it again.

Low battery level will decrease the vibration and the alarm sound. Once this happens, replace batteries with new ones.

CARE OF YOUR PRODUCT

1. Place your clock on a stable surface, away from sources of direct sunlight or excessive heat or moisture.

2. Protect your furniture when placing your units on a natural wood and lacquered finish by using a cloth or protective material between it and the furniture.

3. Clean your unit with a soft cloth moistened only with mild soap and water. Stronger agents such as Benzene, thinner or similar materials can damage the surface of the unit. Make sure the unit is unplugged before cleaning.

4. If the unit is not to be used for a prolonged period, such as a month or longer, remove the batteries to prevent possible corrosion. Should the battery compartment become corroded or dirty, clean the compartment thoroughly and replace the batteries.
