A LITTLE BIT ABOUT SARABEC

SARABEC® AIMS TO MAKE LIFE A LITTLE EASIER FOR THOSE WITH HEARING DIFFICULTIES BY PROVIDING HIGH QUALITY HEARING PRODUCTS THAT INCREASE SOUND LEVEL, QUALITY, & CLARITY SO YOU CAN ENJOY SOUND AGAIN.

OUR AIM IS TO HELP YOU:

Stay in touch with friends & relatives

Know what's happening around the house

Enjoy recreational time without feeling isolated

With over **40 years** of experience, we are experts in providing our customers with hearing solutions, whether they wear hearing aids or not. We work with both private customers and businesses alike, to deliver an unbeatable high quality service. Our products are designed to help with:

Listening - enjoy the TV, radio, & conversations at a volume suitable for you & others, with better sound quality and clarity.

Alerting - Extra loud alerts, vibrations, & bright lights for doorbells, telephones, & alarms.

Telephones - Extra loud, amplified phones including corded & cordless phones, & mobiles.

BUYING FROM SARABEC

Easily order online or over the phone, and get technical help when you need it (before OR after sales!) Don't forget to take advantage of our **FREE delivery!**

1 MONTH TRIAL

Be sure that the products you choose are right for you by trying them at home. If you decide it's not for you, get in touch and we can process the return & refund of the product. Refunds are not applicable if goods are returned damaged, incomplete or have been tampered with.

VAT RELIEF

If you have hearing loss, you can obtain VAT relief on the products in this catalogue that have a green 'VAT relief' sticker, as shown below. See *page 63* for more details on claiming VAT Relief. Note: Some accessories, if not bought as part of a system, cannot be given VAT Relief.

EVERYDAY LIFE WITH A PACEMAKER

Pacemaker manufacturers provide instructions about possible interference from products that you should avoid. Please refer to your booklet about your type of pacemaker, or contact your pacemaker clinic. Further information is given on our website.

SYMBOLS USED THROUGHOUT THIS CATALOGUE:

This product does not qualify for VAT Relief.

VAT Relief is available on this product.

Suitable for users with hearing aids that have the "T" Loop setting or Loop Program

BLUETOOTH AND AURACAST

04 Bluetooth and Auracast
07 earisMAX Range

Auracast, a revolutionary feature of Bluetooth Low Energy (LE) Audio will change how we hear in homes & public venues. It's great for hearing aid wearers who use Bluetooth with their devices.

08

TV & AUDIO

08 Digital Wireless TV Listening Systems
12 Induction Loop Systems
14 Connecting to your TV

Have difficulty hearing your television, radio, Hi-Fi or other audio? Whether you wear hearing aids or not, our portable & stationary systems bring the wanted sound direct to your ears without disturbing others.

16

BLUETOOTH AUDIO

16 Equipment For Mobile Phones
17 Personal & TV Listening
19 Sleep Headphones & Sound Players

More and more hearing aids have Bluetooth capability built into them. You can now connect hearing aids to other bluetooth devices such as phones or TV transmitters via the "T" Loop setting or Loop Program.

20

PERSONAL LISTENING & COMMUNICATION

21 Personal Listeners
23 Personal Audio Accessories

Do you have difficulty in daily listening situations or with conversations at home or otherwise? Our Listening & Conversation products can be used with or without hearing aids, & aim to make life easier. Versatile and portable, these systems offer various listening options to suit your needs.

24

HOME ALERTING

25 Lisa Signolux Home Alerting
34 Fireangel & HiSPEC Smoke/CO Alarms
38 Doorbells & Accessories
42 Geemarc Amplicall Baby Monitor
43 Alarm Clocks

These products make you aware of everyday occurrences in the home or at work via vibrations and flashing lights, so you can "feel" and "see" the alerts. Get alerted to the ringing of the telephone or doorbell, the sound of the smoke or fire alarm or a baby crying.

48

PHONES & ACCESSORIES

50 Mobile Phones
52 Portable DECT Telephones
59 Corded Desktop Telephones
62 Digital Voice Switch-over
64 Phone Accessories

If callers' seem very quiet or muffled on the phone, our telephones and amplifiers can help. *Note:* On page 62, you'll find products that let you know the phone is ringing.

65

TINNITUS

66 Wellcare & Sound Oasis

Manage Tinnitus symptoms and reduce the effects of buzzing/ringing in your ears with our tinnitus relief products that create a relaxing atmosphere, reduce stress, and help you sleep.

68

COMMERCIAL AUDIO

68 LA90 Portable Induction Loop
69 Bespoke service for large public spaces

Accessibility & inclusion for large public spaces. We help improve communication for hearing impaired people in non-domestic environments like a church, village hall or any public space.

72

ORDER FORM & INFORMATION

You can complete your order via this form and attach the VAT Relief Certificate (if applicable), and send it back to us in the post.

BLUETOOTH

AURACAST IS A REVOLUTIONARY FEATURE OF BLUETOOTH LOW ENERGY (LE) AUDIO THAT WILL CHANGE HOW WE HEAR IN HOMES AND PUBLIC VENUES. IT'S GREAT FOR HEARING AID WEARERS WHO USE BLUETOOTH WITH THEIR DEVICES. HERE'S A SUMMARY OF BLUETOOTH TO AURACAST.

WHAT IS BLUETOOTH?

Bluetooth is a form of wireless communication between electronic devices, typically used to transmit audio. Bluetooth is everywhere, on the TV at home, playing your music in the car, your audio book through your earphones, and even taking phone calls through your hearing aids.

BLUETOOTH FOR HEARING AIDS

Bluetooth was first introduced for hearing aids in 2005 by a big hearing aid manufacturer, Starkey. Years later, iPhone and Google created a Bluetooth feature, MFI for iPhone users, and ASHA for Android users. This allowed users to connect devices to their hearing aids via their device settings. However, hearing manufacturers wanted more for their cochlear implant and hearing aid users.

THE SETBACKS OF THE CURRENT BLUETOOTH

Bluetooth as we know it has a transmission range of 30 feet or so, meaning walking too far from the device can weaken the signal and cause the user to hear crackling in their ears. One major drawback of Bluetooth has always been its 1-1 connection. E.g., You can stream to a car stereo, headphones, or hearing aids, but never all three at the same time, but Bluetooth Low Energy Audio aims to change that.

WHAT IS BLUETOOTH 5.3 LE AUDIO?

Bluetooth 5.3 LE (Low Energy) Audio is a protocol that will become the new standard for the next 4-5 years. It hopes to make it easier for users to connect hearing aids.

BETTER SOUND QUALITY, CLARITY, TRANSMISSION RANGE, & BATTERY LIFE

This Low Energy Bluetooth is more efficient & offers a way to send better quality audio signals from one device to another. It is predicted to improve sound quality & clarity, while significantly reducing the battery drainage of your headphones/hearing aids.

WHAT IS AURACAST?

Auracast is transforming how we experience audio in the home. Auracast will allow multiple users to connect to a single audio source, like a TV, sound system, etc. at the same time using their

own Bluetooth devices (hearing aids, Bluetooth headphones, wireless earbuds, etc). This reduces the need for physical connections and avoids traditional Bluetooth limitations like the 1:1 connection. Whether you're enjoying a movie night with family or listening to music, Auracast makes it easier, more flexible, and more enjoyable to access audio with personalised control over the volume and sound. It's a breakthrough that enhances convenience, accessibility, and the overall listening experience for everyone in the household.

ACCESSIBILITY FOR HEARING AID USERS

Auracast is a game-changer for individuals with hearing aids. The direct audio feed from the TV or audio system eliminates the need for external microphones or hearing loops. This direct connection ensures clearer, better quality sound.

HOW WILL AURACAST SHAPE LISTENING TO TELEVISION AND AUDIO IN THE HOME?

MULTIPLE LISTENERS, PERSONALIZED AUDIO

Auracast enables friends or families to watch TV or listen to music without sharing headphones or using splitters. This is especially convenient for those wanting to enjoy high quality audio without compromising on comfort or worrying about disturbing others.

ENHANCED SOUND QUALITY AND RANGE

Bluetooth LE Audio improves sound clarity and extends the range of audio transmission to 300 feet, unlike traditional Bluetooth (approx. 30 feet). This means users can move freely around the house without the signal dropping and continue listening as they go about their tasks. This means that no matter if you're sitting in the living room or moving around the house, you will still experience a more immersive home entertainment experience..

REDUCED BACKGROUND NOISE & DISTRACTIONS.

When using Auracast, you can turn off the TV speakers to reduce background noise in the house. Late-night TV watchers can enjoy their shows without disturbing others, or parents can prioritise tasks while their kids watch their show.

SIMPLIFIED SETUP AND COMPATIBILITY

Setting up Auracast is straightforward now that most modern devices support Bluetooth LE Audio. First, ensure your audio source has an Auracast-enabled transmitter. Then easily connect and stream audio to multiple devices by selecting the audio source from your device's settings.

BLUETOOTH 5.3 FEATURES:

				
IMPROVED POWER EFFICIENCY	ENHANCED SECURITY	FASTER CONNECTIONS	HIGHER DATA TRANSFER RATES	BETTER INTERFERENCE MANAGEMENT
Devices can last longer on a single charge. (Great for hearing aids, wearables and IoT devices).	Safer connections, protecting your data from unauthorized access.	Quicker, more reliable pairing, reducing the time it takes to connect devices.	Faster data transfer, enabling smoother streaming and quicker file sharing.	Improvements mean more stable connections even in environments with many wireless signals.

AURACAST FEATURES:

				
MULTI-DEVICE AUDIO SHARING	ENHANCED AUDIO QUALITY	SEAMLESS BROADCASTING	ACCESSIBILITY FEATURES	VERSATILE APPLICATIONS
Multiple users can connect to an audio source simultaneously, perfect for shared listening experiences in public or private settings.	Supports higher quality audio streaming, providing a richer, immersive listening experience.	Seamlessly broadcasts audio to multiple devices, making it ideal for events, museums, & educational settings.	Hearing aids & other assistive devices can directly receive audio broadcasts, improving accessibility for those with hearing impairments.	From personal entertainment to professional uses, Auracast offers versatile applications, making it a game-changer in wireless audio technology.

SARABEC ARE PROUD TO INTRODUCE THIS NEW BLUETOOTH AND AURACAST TECHNOLOGY TO OUR HEARING PRODUCT RANGE.

The new Bluetooth 5.3 and Auracast represent the forefront of wireless communication and audio technology, offering enhanced efficiency, security, connectivity, and user experience. As this year progresses, we will see more and more hearing aids hit the market with Bluetooth Low Energy Audio already installed.

SARABEC'S NEW AURACAST-ENABLED earisMAX DEVICES NOW AVAILABLE

We now offer products that feature Auracast™ and Bluetooth LE protocols. The **NEW** earisMAX devices are excellent for those wanting the ultimate listening experience with ultra-low latency and the ability to tune the sound output to their audiogram.

earisMAX: AURACAST-ENABLED DEVICES

earisMAX Auracast & Bluetooth 5.3 LE Transmitter

Elevate your audio experience with the earisMAX Bluetooth® Auracast™ transmitter, your gateway to seamlessly connecting non-Bluetooth audio sources to Bluetooth-enabled devices like headphones and hearing aids. It has optical, HDMI and analogue audio connections, and is very easy to setup and use.

earisMAX Auracast & Bluetooth LE 5.3 Transmitter

Order code	230-275	Colour	Black
Price (Inc. Vat)	£143.99	Size	100 x 70 x 20mm
   			

earisMAX Headphones (Bluetooth 5.3 LE & Auracast)

These Auracast™-enabled headphones receive all of your favourite audio streams, whether it's single-channel Bluetooth® Classic, two-channel Bluetooth® LE Audio, or broadcast audio via Auracast™. Pair with the earisMAX transmitter to get the best sound experience possible.

earisMAX Headphones (Bluetooth 5.3 LE & Auracast)

Order code	230-274	Colour	Grey
Price (Inc. Vat)	£251.99	Size	170 x 192 x 82 mm
   			

earisMAX Wireless Charging Cradle

A wireless charging stand for the earisMAX headphones. This convenient stand means that you do not need to plug the headphones in to charge them up - they can simply be placed on the cradle. This will also help to extend the life of the headphones as the headphones charging socket will not be damaged or stretched out.

earisMAX Wireless Charging Cradle

Order code	230-276	Colour	Black
Price (Inc. Vat)	£119.94	 	

earisMAX Bluetooth/Auracast Microphone

The earisMAX Auracast™ streaming microphone is small in size but big in performance. Simply clip to clothing, hold in your hand or place on a surface to pick up a voice or other sound source. It sends the audio signal to any bluetooth or auracast-enabled receiving device like the earisMAX headphones.

earisMAX Bluetooth/Auracast Microphone

Order code	230-277	Colour	Black
Price (Inc. Vat)	£106.74	   	

TV & AUDIO

DIGITAL & WIRELESS TV LISTENING SYSTEMS

WHAT IS A TV LISTENER?

TV listeners let you listen to your audio devices (TV, radio or other device), at a volume that you are comfortable with, without disturbing others. With no trailing wires, TV listeners bring the sound directly to your ears.

IS A TV LISTENER RIGHT FOR ME?

Do you want to listen to the TV at a higher volume than other members of the family? Is listening in a noisy situation stressful? Is turning the volume up on the TV or radio not enough? Do you have difficulty in hearing the programmes clearly?

If friends or family complain that your TV or radio is too loud then that's when one of our TV Listening systems may prove invaluable as they can drastically improve your entertainment enjoyment. With these wireless TV listening systems, you can choose how loud you want the sound to be without disturbing others. You can also move around freely without the need to have trailing wires between you and the device you're listening to (Note: you will still need to connect the

transmitter to your TV, radio or music to pick up the sound using the leads provided).

TV LISTENERS FOR HEARING AID USERS

Your hearing aid may have the "T" Loop setting or Loop Program. Select one of the products with the T symbol next to it to make the most out of your hearing aid and enhance your listening. Sounds will be transmitted directly to your hearing aid's T loop program, increasing intelligibility and significantly reducing background noise. Products without the T symbol are suitable for those who do not wear hearing aids. All TV Listeners require you to wear a receiver whether or not you use a hearing aid.

HOW DO TV LISTENERS WORK?

Digital listening systems use the 2.4GHz frequency to transmit their sound from the transmitter to the receiver. They use a coding system that means they are unlikely to suffer any form of interference. The coding system requires the transmitter to be matched/paired to the receiver(s) required. Multiple receivers can normally be used with a single transmitter.

sonumaxx^{NX}

SONUMAXX - A SIMPLE-TO-USE TV LISTENING SYSTEM FOR BOTH HEARING AID AND NON-HEARING AID USERS.

With its clear sound, the latest Sonumaxx Digital Wireless System will help you listen more clearly to your TV, radio, or other sound sources without any trailing leads.

With the Sonumaxx system you can switch between the transmitter and internal microphone in the receiver when listening to the TV sound. This is because Sonumaxx receivers have a built-in communication microphone and amplifier function, this allows the user to receive amplified sounds from conversations all at the press of a button on the receiver, very useful one to one speech with friends or family!

When listening to the TV, you can listen at your own volume without disturbing others. You can also move around whilst listening to TV, radio or Hi-Fi as the signal is not interrupted by walls. The system has a range of up to 25 metres and the headset systems have an output of up to 125dB.

OUR RANGE OF SONUMAXX SYSTEMS

There are two types of systems available; the standard Headset System where the headset and receiver unit are a single device, and the PR systems; these allow you to plug any audio listening accessory into the receiver unit such as headphones, neckloop, ear hooks etc. You can see all 4 options here.

SYSTEM COMPONENTS

All systems consist of two parts; a mains powered transmitter and a receiver powered by a rechargeable battery. The transmitter picks up the sound from your TV using the supplied connection lead kit or microphone. This sound is then sent to the receiver. The Sonumaxx systems are already paired for your convenience and to avoid interference.

BATTERY LIFE

A fully charged battery can give up to eight hours listening time depending on the volume level used. The system is supplied with a second battery to provide continuous listening. An intelligent charging system ensures batteries will be recharged fully in less than 3 hours.

Sonumaxx NX Headset System

Transmitter, Conventional Under-chin Headset Receiver & Connection Lead Kit with Microphone.

Sonumaxx NX Headset System

Order code	230-416	Colour	Black/Grey
Price (Ex. Vat)	£121.90	Size	Base: 125mm Ø x 40mm
Price (Inc. Vat)	£146.28		Receiver: 225x 125x25mm

Sonumaxx NX PR Headset System

Transmitter, PR Pocket Receiver, Plug-in Stethoscope Headset & Connection Lead Kit with Microphone.

Sonumaxx NX PR Headset System

Order code	230-425	Colour	Black/Grey
Price (Ex. Vat)	£128.99	Size	Base: 125mm Ø x 40mm
Price (Inc. Vat)	£154.79		Receiver: 225x 125x25mm

Sonumaxx NX PR Neckloop System

Transmitter, Pocket Receiver, Plug-in Neckloop & Connection Lead Kit with Microphone.

Sonumaxx NX PR Neckloop System

Order code	230-426	Colour	Black/Grey
Price (Ex. Vat)	£128.99	Size	Base: 125mm Ø x 40mm
Price (Inc. Vat)	£154.79		Receiver: 225x 125x25mm

Sonumaxx NX PR Headset/Neckloop System

Transmitter, Pocket Receiver, Headset, Neckloop & Connection Lead Kit with Microphone.

Sonumaxx NX PR Headset/Neckloop System

Order code	230-427	Colour	Black/Grey
Price (Ex. Vat)	£137.99	Size	Base: 125mm Ø x 40mm
Price (Inc. Vat)	£165.59		Receiver: 225x 125x25mm

earis®

PREMIUM DIGITAL WIRELESS LISTENING

WHAT IS EARIS PREMIUM WIRELESS LISTENING?

The Earis Premium System is a digital TV listening system that uses dynamic sound technology to deliver the highest sound quality and clarity available in TV Listening Equipment today - brilliant for people with or without hearing aids wanting to watch TV or just listen to music. The system is easy to use and is ready to connect to TV and audio systems.

SELECT FROM TWO EARIS PREMIUM LISTENING OPTIONS:

Both the headset receiver system and the PR Neckloop System use the same transmitter, which has connections and cables for digital audio and analogue audio signals that are typically present on all TV's and Sky, Virgin and Freeview boxes. The PR Neckloop System allows you to plug in your choice of listening device (headset/earphones/ear hooks etc).

5 TONE PROFILES

Through extensive research into the listening needs of hearing-impaired people, it has been determined that 5 Tone Profiles match the needs of 95% of users when listening to speech and/or music from film, TV, radio or any other sound source. Earis Premium then delivers constant high quality sound using the chosen profile.

IMPROVED UNDERSTANDING OF SPEECH IN AUDIO

Earis Premium significantly improves understanding of speech in audio even if background sounds are present. You choose from the 5 selectable Tone Profiles you like, to create a personalised listening experience. The fast-acting Automatic Tone Profiling eradicates sudden changes in sound at the chosen listening level, which is especially useful when changing channels, or when adverts cut in.

Earis Premium Digital Headset System

This headset receiver, is ideal for people who do not wear hearing aids, or those who may not wish to wear their aids to watch TV or listen to music.

Earis Premium Digital Headset System

Order code **230-190**
Price (Ex. Vat) **£249.00**
Price (Inc. Vat) **£298.80**

Colour **Graphite/Silver**
Size **Headset:**
244x112x24mm

Earis Premium Digital Neckloop System

This neckloop system is ideal for hearing aid wearers who have a Loop or "T" program on their aids.

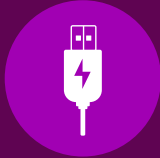

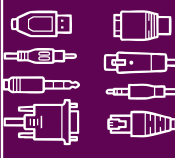

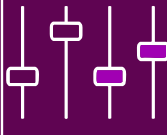

Earis Premium Digital Neckloop System

Order code **230-191**
Price (Ex. Vat) **£264.00**
Price (Inc. Vat) **£316.80**

Colour **Graphite/Silver**
Size **Receiver:**
63mmØx24mm

BOTH SYSTEMS FEATURE:

		
Built-in receiver charging cradle and charging port for an optional second battery	Connection kit for TV and audio systems	Easy-to-use communication amplifier available at the press of a button on the receiver
		
Replaceable rechargeable battery, with fast full charge in under 2 hours - 80% in 30 minutes. (Full battery lasts approx. 8hrs).	Tone & Balance controls	Large tactile volume wheel with LED level display

CL7500 OPTI WIRELESS HEADPHONES

THE GEEMARC CL7500 OPTI IS DESIGNED FOR HEARING-IMPAIRED PEOPLE.

It has an adjustable volume of up to 125dB SPL, making it suitable for people with hearing loss ranging from low to severe. The headset is lightweight, weighing in at only 260 grams. The earpieces contain controls which include Left & Right Balance, & volume and tone. You can charge your wireless TV headset by placing

it on its base, using an external battery, or even connecting it directly to your laptop! It takes 6 hours for the batteries to fully charge.

The CL7500 main base can be plugged into your televisions digital optical or analogue output sockets using the leads provided. It also works with other audio devices such as radios & DVD players, as long as those devices have a compatible audio output socket.

CL7500 OPTI Wireless Headphones

Order code	252-221	Colour	Silver/Black
Price (Ex. Vat)	£141.66	Size	Base: 205x130x75mm Headset: 190x160x65mm
Price (Inc. Vat)	£169.99		

- ✓ Built-in digital treble/bass adjustment (+/-10dB)
- ✓ **Amplification up to +125dB**
- ✓ Balance Control (left/right)
- ✓ Digital optical & analogue connections

INDUCTION LOOP SYSTEMS

WHAT IS AN INDUCTION LOOP SYSTEM?

Induction loop systems transmit sound directly to a hearing aid's loop ("T") facility or program which is built into, or can be enabled in most hearing aids.

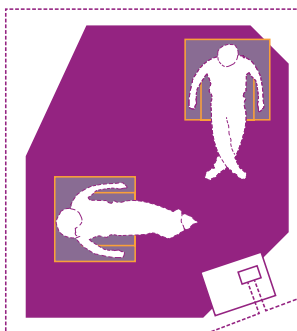

Using the loop facility minimises the distracting effect of background noise, which in effect, enhances the sounds you want to hear and makes them easier to understand. Because the loop receiver facility is built into your hearing aid, you will not need to wear an additional receiver.

HOW DOES IT WORK?

A small amplifier is positioned near the television or sound source, it is then plugged into the television/sound source using one of the supplied direct connection cables (most commonly used is the optical digital cable - the socket for this may be marked up on your TV as Optical, SPDIF, TosLink or Digital Audio).

A very thin wire runs around the perimeter of the room to and from the amplifier. This wire can be positioned underneath floor surfaces such as carpet, laminate, or wood. It can also be attached to/follow your skirting boards or picture rail, or even be placed in a ceiling cavity or attic.

Some users find that though they benefit from the sound of the TV being directly

transmitted to their hearing aid, they feel cut off from other useful sounds like the doorbell or their partner speaking. This can be overcome by asking your audiologist for an additional program where the loop and microphone are mixed together (sometimes known as M/T or mixed loop and mic).

The real beauty of a loop system is that once installed, and your chosen volume and tone levels are set to how you like them, there is little to no interaction required with the amplifier.

Not sure how to use the loop features of your hearing aid? Ask your audiologist as you may need to activate the features, or adjust the sensitivity of the loop program.

Both the LA240 Room Loop System and the LA240 Loop Pad are supplied with lead kits that let you connect the amplifier directly to your TV with digital optical, phono and jack connectors, and they both come with a microphone that has a 1.2m lead (can be used for conversation or monitoring the telephone or doorbell ring). *See next page for other connection possibilities.*

DIFFERENCES BETWEEN THE ROOM LOOP SYSTEM AND LOOP PAD SYSTEM:

The room loop system will cover an entire room, and you will pick up the sound from the system wherever you are within the room. However a loop pad system generates a very localised loop signal via its small loop pad which goes under a cushion or on the back of a chair. You will only pick up the signal while sitting in that one place.

LA240 Room Loop System

This system will cover an entire room.

LA240 Room Loop System

40 metres (approx 130ft) of thin, white loop cable 2.5mm diameter) and cable clips

Order code **135-250**
Price (Ex. Vat) **£137.47**
Price (Inc. Vat) **£164.99**

Colour **Silver**
Size **180x140x42**

LA240 Loop Pad System

Ideal for a single person or where a limited loop field is required. (Supplied with 5m (15ft) connecting lead.

LA240 Loop Pad System

This LA240 system includes a pad in place of the cable reel.

Order code **135-255**
Price (Ex. Vat) **£137.49**
Price (Inc. Vat) **£164.99**

CUSTOMER REVIEWS

"Product met all my expectations, a excellent service."

"Really helpful reliable company."

"Fast delivery - great product (Curved Wake 'N' Shake clock)."

"Have no fear about purchasing from this wonderful company. Just do it. They act fast and do what they say immediately."

"A really must have for anyone with a hearing loss."

TV & Audio

USEFUL ADVICE FOR CONNECTING OUR EQUIPMENT TO A TELEVISION OR OTHER AUDIO SOURCE

CONNECT DIRECTLY TO A TELEVISION

When connecting directly to a TV set via optical, you must ensure the TV is set to PCM. To do this, go into the audio/sound settings menu on the TV and look for 'Digital Audio Output/Optical Out', normally this would be set to 'Dolby Digital', it needs to be changed to 'PCM'. Please note that some televisions auto switch this setting! **NOTE:** Using the microphone supplied with your equipment attached to the speaker grille of the television will always return good results and is an excellent back-up way to connect to the TV.

SET UP YOUR EQUIPMENT WITH DIRECT CONNECTION TO SKY Q & SKY HD BOXES VIA OPTICAL

- » Press **Home** on your Sky Q remote, select **Settings**, then select **Setup**.
- » Select **Audio visual**, then select **Digital Audio Output** optical and set it to **NORMAL**
- » Press the **GREEN** button to save the settings
- » Power **OFF** the Sky Box, leave for 30 seconds and turn back on, leave for 5 minutes so the box can re-calibrate itself and then test the system.

Note: Direct connection to a Sky Stream Puck is not possible, however the following may help: **Settings > picture and Sound > Sound > change HDMI output from Auto/DD+/DD /Passthrough to PCM Stereo.** You will also need to change the audio output on your TV to PCM (as per instructions above).

SET UP EQUIPMENT WITH DIRECT CONNECTION TO VIRGIN MEDIA SET TOP BOXES VIA OPTICAL

- » Press **Home** on your remote > Select **Help & Settings** > Select **Settings** > Select **Audio**
- » Choose **Dolby Digital to PCM**. This setting applies to both HDMI and optical out.
- » Power down the box for 5 minutes, restart it, leave for a few mins, then test the system.
- » **Virgin Media 360 Boxes ONLY: Select Settings > Audio & Video > PCM2.0 > Restart Box as above.**

WHY DON'T I GET AUDIO FROM DIGITAL SOURCES (NETFLIX, APPLE TV, FIRE STICK, ETC)?

Audio coming from certain content providers or devices (Netflix, Amazon Prime, Apple TV etc.) is set to output Dolby and not PCM by default. To resolve this, you will need to change the digital audio output format in the app or device to PCM. Firstly, try the normal audio settings within the app. Usually, these audio settings are only available once something is playing on screen. This does **NOT** guarantee that you will hear the audio from these sources through your device but it does give the best chance. **N.B** When connecting directly to an external device such as SKY or Virgin Media you will not hear channels and smart services from the TV through the connected equipment.

AUGUST2024 Rev 5.0

DIGITAL CONNECTION CONVERTERS

Dolby Digital Audio Decoder Kit

A clever little device which will, in most cases, allow you to connect any of our Television Listening Systems (LA240, Sonumaxx & Earis) to any television, set top box, or audio output device without needing to change the settings on the television to output PCM signals. This is especially useful when the television or other audio source doesn't auto switch to PCM output or when you cannot find the appropriate settings in the menu systems.

Dolby Digital Audio Decoder Kit

Order code	354-132	Colour	Black
Price	£29.99 Inc. Vat	Size	105 x 75 x 25mm

Sarabec HDMI ARC Audio Extractor Kit

If connecting to your television using our ARC Audio extractor then you must ensure that the HDMI socket you connect to is marked as HDMI ARC or HDMI eARC. If after connecting your equipment to the television via the ARC Audio extractor you do not get a sound output, or the sound you get is distorted then please change your televisions audio output settings to PCM, STEREO or AUTO instead of Dolby Digital.

N.B Connection via the eARC socket will in most cases cut out the internal speakers from the television. *This item can also be used in place of a Digital Audio Converter for use with older equipment that doesn't have an optical socket. Some televisions auto switch this function, most do not.*

HDMI ARC Audio Extractor Kit

Order code	354-130	Colour	Black
Price	£39.98 Inc. Vat	Size	100 x 70 x 25mm

COMMON SOCKET TYPES

Optical/SPDIF/Digital Audio/TOSLink

Preferred connection method, will generally require a change to the TV or connected equipment to PCM audio output.

HDMI

Can be used in conjunction with the Sarabec ARC Audio Converter.

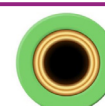

PHONO/RCA

Can be a good option, but make sure that the RCA sockets are marked as Audio Output and NOT Audio Input.

3.5mm Audio/Headphone

A good method of connecting. However, in most cases, using this socket will turn off the internal speakers of the television.

*BLUETOOTH AUDIO

WHAT IS BLUETOOTH?

Bluetooth is an easy to use wireless communications technology now found worldwide in products we use every day, including headsets, smartphones, laptops, and portable speakers. Bluetooth technology is a secure system that is used for short range wireless communication and listening. It allows you to enjoy sound that is free of interference and background noise. Bluetooth devices typically have a range of 5 - 10 metres.

BLUETOOTH TECHNOLOGY FOR HEARING AIDS

More and more hearing aids have Bluetooth capability built into them, and Bluetooth is increasingly being used to connect hearing aids to other devices. Hearing aid streamers use bluetooth to connect to phones and TV Bluetooth transmitters. The hearing aid works by using the aid's own radio system, "T" Loop setting, or Loop Program to pick up the bluetooth signals.

BLUETOOTH NECKLOOPS

Bluetooth neckloops are universal receivers, and unlike streamers, can be used with any hearing aid that has a "T" Loop setting or Loop Program. So, if you change your brand of hearing aid, you won't need a new streamer. They can be paired with any device that has a bluetooth output. Bluetooth neckloops allow you to move freely around whilst being connected to your mobile phone. They also enable discreet conversation without using the hands-free mode.

BLUETOOTH® ADVANCEMENTS

As technology improves, it's now possible to connect (pair) more than one device with the Bluetooth receiver, so switching between a phone and TV becomes easier. More recent introductions of Bluetooth (newest version: 5.3 - See page 4 for more information), means that any delays in receiving sound have been rectified, including delays in lip-sync, and the power required to run the receivers.

BLUETOOTH EQUIPMENT FOR MOBILE PHONES

KEEP YOUR HANDS FREE WHILST MAKING AND ANSWERING PHONE CALLS.

CM-BT2 Bluetooth Neckloop

Wirelessly connect your bluetooth phone and hearing aid via the "T" Loop setting or Loop Program. You can now communicate with other devices when using a Bluetooth neckloop. Control the volume of the loop directly on the receiver. A built-in microphone allows full two-way communication.

- Power supply and charging cable
- 3.5mm socket to listen via other accessories

PHONAK
life is on

BLUETOOTH EQUIPMENT FOR ARTONE PERSONAL & TV LISTENING

Artone 3 Max Bluetooth Loopset

Artone 3 MAX streamer is the most powerful Bluetooth neckloop on the market - it works even for those with severe hearing loss and cochlear implants.

You will not need Bluetooth hearing aids. The Artone 3 Max will connect your Bluetooth devices to a standard loop-enabled hearing aid, giving them Bluetooth connectivity, & providing you with a hands-free/wire-free experience when using your mobile phone, or when using other Bluetooth devices to listen to music and TV.

Artone 3 Max Bluetooth Loopset

Order code	233-005	Colour	Black
Price (Ex. Vat)	£109.99	Size	45x30x15mm
Price (Inc. Vat)	£131.99		

Artone MIC Wireless Bluetooth Microphone

A wireless microphone that connects to your Artone Bluetooth Loopset. It will help you to hear the sounds you were missing until now.

The wireless microphone can be used by someone speaking at a distance from you and where there is background noise.

- Stereo frequency range - A2D2
- Microphone sensitivity control
- Direct Audio Input option
- Rechargeable
- Microphone with USB charging cable
- Tie clip microphone
- 10cm 3.5mm jack to jack lead

Artone TVB TV Transmitter (Optical)

The TVB transmitter only works in conjunction with the Artone 3 Max. If you can hear the TV but with all the background noise of your surroundings, then that's when you need to use the TVB with the Artone 3 Max. It will transfer the sound from your TV direct to your loop-enabled hearing aid without interference.

- Transmitter with USB power cable
- Optical Audio Lead
- 10cm 3.5mm jack to jack lead

Price (Inc. Vat)	£53.76			 

PERSONAL LISTENING & COMMUNICATION

LISTENING TO CONVERSATION

PERSONAL LISTENERS

If you have difficulty catching everything that is said in conversation you may benefit from using one of our Personal Listeners which amplify the sounds you want to hear and brings them closer to your ears.

HOW TO USE A PERSONAL LISTENER?

You can use a personal listener for conversation with friends or at work where you might find listening in a group or noisy situations stressful. Then, later in the day, you can use it to relax & listen to TV, radio, & music on your device or computer.

CHOOSE THE WAY YOU WANT TO LISTEN

Choose between headphones, headset or earphones, or use your hearing aid on the "T" Loop setting or Loop Program with a neckloop or ear hook. Your hearing aid may have the "T" (loop) facility. With this, you can enhance your listening by making more of your hearing aid. Sounds will be transmitted directly to your hearing aid, significantly reducing background noise.

SARABEC QUALITY

Sarabec® audio products provide clear, sharp sound reproduction leading to relaxed, stress free listening. These versatile products allow you to connect directly to various types of audio & visual equipment.

PERSONAL LISTENERS CRESCENDO 60 RANGE

WHAT IS THE CRESCENDO PERSONAL LISTENER?

The Crescendo 60 personal listeners will amplify conversation, or even the sound of television & audio, allowing you to listen at a volume that is comfortable for you. There is now no need to have the television or radio volume at a level that will disturb your family, friends or neighbours. You can take part in conversation with the help of the Crescendo which transmits the sounds clearly into your ears, effectively improving your

overall listening experience.

FOR USE WITH THE TV & FOR CONVERSATION

The Crescendo Personal Listener is a portable listener which is light and comfortable to use. For conversation, use the plug-in microphone to pick up the sound. For use with a TV or radio either a microphone or direct connection lead is used to pick up the sound. The Crescendo Personal Listener requires no technical knowledge to assemble, simply plug the accessories into the appropriate sockets and it is ready to use.

WHAT DO THE CRESCENDO SYSTEMS OFFER?

The range of systems listed allows you to choose a complete ready-to-use system, especially suited to your needs.

Some of the features of the Crescendo 60's include:

- A rotary volume control
- A rotary tone control (to boost high or low tones)
- An indicator "on" light with a low battery warning
- Mode selection microphone, direct input & loop pickup
- 2 AA alkaline batteries (supplied) for up to 60hrs use
- Belt clip & Neck cord
- A plug-in microphone for 1:1 communication
- Additional microphone (1.2m lead & tie-clip supplied) in case microphone needs to be placed closer to the sound source.
- Velcro pads for attaching the additional microphone to a loudspeaker grille
- A 3m extension for microphone or other listening option.

PERSONAL AUDIO ACCESSORIES

These listening options can be used with Sarabec's current & discontinued products such as the Crescendo, Sonumaxx & Earis, or used independently with any equipment with a 3.5mm jack socket (music players, laptops & tablets).

You may not need a complete amplifying system. You can amplify sound with one of our accessories below and improve sound output &

quality from your device, OR use with a Sarabec system for the ultimate listening experience.

Use these products with or without a hearing aid. Hearing aid users will receive sound, free of background noise, directly to the hearing aid. Ear Hooks offer excellent reproduction if using the "T" Loop setting/Loop Program.

HEADSETS

Stethoscope Headset HS7

Designed to be worn under the chin. Lightweight and comfortable, these are the most popular headsets giving the loudest output. They are suitable for mild to moderate hearing loss. They have rubber ear tips that are very soft and comfortable to wear. These ear tips are washable and can be renewed.

- 1.0m Connecting Lead
- 3.5mm Stereo Jack Plug
- Impedance:16 ohm

Plug In / Communicator Microphone

Order code **330-009**
Price (Inc.. Vat) **£13.79**

Colour **Black**

HOME ALERTING

Alerting - Telling you what's happening

WHAT ARE ALERTING DEVICES?

Alerting devices make you aware of everyday occurrences at home or at work, e.g. the ringing of the telephone or doorbell, alarm clocks, the sound of the smoke or fire alarm, or a baby crying. You'll either "feel" these occurrences via a vibrating pad or "see" that these are happening via a flashing light. This Alerting section offers a rich variety of choice.

THE COMPLETE HOME ALERTING SYSTEM

Full home alerting systems allow you to completely tailor a system to your needs - meaning a single receiver device will warn you of all the occurrences mentioned above. Add more receivers to these systems for added flexibility.

SMOKE ALARM SYSTEMS

Smoke alarm systems are invaluable to hard of hearing people, particularly if they remove their hearing aids at night. You could benefit from the independence and security of such a system with a vibrating pad and flashing strobe.

DOORBELL SYSTEMS

A range of totally wire-free doorbells, either battery or mains powered, means that you won't miss that important parcel or caller at

your door. You can use the portable chimes in whichever room you choose, and the battery powered chimes can be taken into the garden or shed.

Please remember that building structures e.g. metal, uPVC door frames and thick walls may affect transmission. **Where a range for a product is quoted this is the maximum without obstructions.*

TELEPHONE SYSTEMS

Do you miss out on telephone calls because you don't hear the phone ringing? No matter if you're at work in a noisy workshop, watching TV in your lounge with the doors closed and the phone is ringing in the hallway, or you're listening to music through your hearing aid or headphones, these telephone alerting products can help keep you alerted.

ALARM CLOCKS

Getting up in the morning can be a chore for anyone, but if you have difficulty hearing the alarm, your sleep will be less than peaceful if you are worried about sleeping in. A little assistance from either a vibrating pad and/or a flashing light could make that morning feel less stressful.

THE LISA SIGNALUX ALERTING RANGE

Get alerted to events around the home with our complete Lisa Signolux systems. Explore our range of transmitters, receivers, accessories & batteries.

The Lisa Signolux alerting systems now include additional features found on more expensive systems to make it the affordable solution for deaf & hard of hearing people. The simple, efficient, & cost effective system is ideal for those wanting peace of mind.

Get alerted to sounds around the home. The receivers will alert you via a combination of loud sound, visual indications & or vibrations. This sophisticated system uses just two universal transmitters to keep installation as simple as possible. The options include an audio transmitter that uses microphones to detect sound, or a direct transmitter that can be connected to existing devices around the house. Dedicated transmitters are available for person-to-person, bell push, and smoke alarms.

FEATURES AND BENEFITS:

All receivers are wireless, and offer easy wireless installation between transmitters and receivers. They come with either a vibrating pad, plug-in mains powered strobe receiver for bright white flashing lights, coloured indicators, or loud sound alerts.

Receivers have either 6 or 8 coloured icons to visually identify the source of the sound. Up to 8 transmitters (sound detectors) can be coded to each icon.

Additional receivers and transmitters can be added to your system as required. They can be carried around for use in and around the house. They offer:

- Choice of 15 loud sounds up to 90dB output
- Wirefree; uses 868 MHz radio frequency to send and receive system signals
- Secure coding system avoids interference from neighbouring systems
- Operating range of up to 200m
- Portable pocket or clip-on vibrating receiver
- Battery operated with mains adaptor option
- Batteries included with the kits where necessary

Home Alerting

HUMANTECHNIK

LISA SIGNOLUX SYSTEMS

Lisa Signolux Tower Doorbell System

Introducing the new standard system in the Lisa Signolux range, designed for people with hearing problems to inform about domestic events. The 2-part system, made up of a Lisa Signolux bellpush and Lisa Signolux Tower receiver, comes supplied with rechargeable batteries and a mains power supply as standard.

- 16 x chime sounds
- Extra loud: 95dB+
- Mains powered + rechargeable
- 3.5mm socket for vibrating pad & other alerts
- 8 x easy-to-see visual indicators
- Bright flashing light with 360° visibility
- Compatible with older Lisa Signolux transmitters

Lisa Signolux Plug-in Doorbell System

A plug-in flashing doorbell system which also interacts with the standard Lisa Signolux system transmitters.

- Indicators - flashing lights & coloured LEDs
- 3.5mm socket for vibrating pad & other alerts
- Doorbell symbol displayed on the front
- Displays telephone, baby cry, pager, fire & alarm alerts when attached to the correct transmitters
- Supports additional signal transmitter modules

Please note, this is a flashing/indication ONLY system, it does not make any sound unless a sound module is plugged into it.

HUMANTECHNIK

LISA SIGNALUX TRANSMITTERS

Lisa Signalux Audio Universal Transmitter

Used to pick up audio signals from different sources such as a baby crying, an existing doorbell, an intercom system or the telephone ringing.

Lisa Signalux Audio Universal Transmitter

Order code	230-720	Colour	White
Price (Ex. Vat)	£59.99	Size	122x75x38mm
Price (Inc. Vat)	£71.99		

Lisa Signalux Direct/Phone Universal Transmitter

Used to alert the user to the telephone ringing (by plugging into a BT socket), can be used to wire into an existing hard-wired doorbell system, alarm panel or water level indication.

Lisa Signalux Direct/Phone Universal Transmitter

Order code	230-721	Colour	White
Price (Ex. Vat)	£59.99	Size	122x75x38mm
Price (Inc. Vat)	£71.99		

Lisa Signalux Sound Monitor Transmitter

The Lisa Signalux Sound Monitor is capable of learning 3 different sounds such as tones from timers, ringtones, alarm, sounds from CO2-detectors & smoke alarms etc. Once learned, the system then transmits these sounds as alerts via a Lisa Signalux receiver.

Lisa Signalux Sound Monitor Transmitter

Includes: Rechargeable Batteries, and Charger

Order code	230-718	Colour	White
Price (Ex. Vat)	£139.99	Size:	122x75x38mm
Price (Inc. Vat)	£167.99		

Lisa Signalux Baby Monitor Audio Transmitter

Can be used to pick up audio signals from a baby crying, and has a sensitivity control, so you can set it to the strength of your baby's cry. This transmitter sends a radio signal to a Lisa Signalux receiver which will alert you through audio and visual signals.

Lisa Signalux Baby Monitor Audio Transmitter

Includes: Plug-in Microphone and Charger

Order code	230-719	Colour	White
Price (Ex. Vat)	£79.97	Size:	122x75x38mm
Price (Inc. Vat)	£95.96		

LISA SIGNALUX BELLPUSH

Lisa Signalux Bell Push / Person Call Button

A vertical door bell push for the Lisa Signalux system which can be used at either the front or back door, or works well as a personal call button. The push features a red confidence light and can be wall-mounted using the supplied double-sided adhesive fixing strip.

Lisa Signalux Bell Push / Person Call Button

Bell push with CR2032 battery

Order code	230-710	Colour	White/Grey
Price (Ex. Vat)	£27.99	Size:	80x40x16mm
Price (Inc. Vat)	£33.59		

Lisa Signalux Bell Push Landscape/ Person Call Button

The Lisa Signalux wireless landscape Bell Push can be used as an additional Doorbell Push for a Lisa Signalux Visual Alert System or as a replacement. Can also be used in a carer/patient scenario.

- Weather resistant to IP55
- LED Confidence Light
- Name Plate

Lisa Signalux Bellpush Landscape/ Person Call Button

Landscape bell push with CR2032 battery and name card

Order code	230-711	Colour	Grey/White
Price (Ex. Vat)	£27.99	Size:	80x40x16mm
Price (Inc. Vat)	£33.59		

LISA SIGNALUX DETECTORS

Lisa Signalux Guardian Interlink Smoke Detector

The Lisa Signalux Guardian Interlink Smoke Detector works seamlessly with the Lisa Signalux visual indication system, and will allow you to interlink smoke alarm systems by pairing a number of these alarms to a Lisa Signalux receiver or many receivers.

It operates as a standard smoke alarm, but also sends a wireless signal to a Lisa Signalux Receiver so that a user may be alerted by loud sounds, visual indications and vibrations.

- Self-testing function
- Warning given at low battery level
- Loud alarm tone
- Easy to install and set-up

Note: The Interlink Carbon Monoxide Detector can help extend the system further & offer extensive coverage.

Lisa Signalux Guardian Interlink Smoke Detector

Order code	230-729	Colour	White
Price (Ex. Vat)	£102.84	Size:	95mmØx50mm
Price (Inc. Vat)	£123.41		

Lisa Signalux Interlink CO Carbon Monoxide / Heat Detector

This Lisa Signalux Interlink combined carbon monoxide and temperature detector can be used in areas unsuitable for regular smoke detectors. The use of regular smoke detectors with optoelectronic sensor technology (smoke particle detection) can increasingly lead to false alarms.

The new combined Lisa Signalux Interlink CO Carbon Monoxide/Heat Detector detects and reports elevated carbon monoxide levels in the room air at an early stage, and also reacts when the room temperature exceeds a limit of 60 °C. Particularly great for rooms with fireplaces, garages, or in areas in which there are fuel-operated devices and where incomplete combustion processes cannot be ruled out, or where there is a risk that harmful smoke gases, especially carbon monoxide, can spread.

Lisa Signalux Interlink CO Carbon Monoxide/Heat Detector

Order code	230-730	Colour	White
Price (Ex. Vat)	£102.84	Size:	95mmØx 50mm
Price (Inc. Vat)	£123.41		

Lisa Signalux Alarmo 2 Detector

When an independent smoke alarm sound is detected, Alarmo transmits a radio signal to all Lisa Signalux receivers within range, which then alerts you to the event.

There is no need to replace your smoke alarm because Alarmo can detect the alarm sounds from existing smoke alarms without the need for any modification or wiring.

It incorporates a highly intelligent processor which listens out for a typical domestic smoke alarm sound, and is therefore extremely good at not creating false alerts.

Lisa Signalux Alarmo 2 Detector

HiSPEC Alarms

HOME SAFETY SOLUTIONS FOR THE HEARING IMPAIRED

WHAT IS THE HiSPEC RF10-PRO RANGE?

The HiSPEC RF10-PRO range of smoke, heat, and carbon monoxide alarms are designed to function throughout their lifespan without requiring a battery change, thanks to their built-in sealed, long-life lithium batteries and radio interlinking capability, allowing all alarms in the system to sound simultaneously when one detects an issue.

KEY FEATURES OF THE HiSPEC RF10-PRO RANGE

NO NEED TO REPLACE BATTERY:

The alarms are powered by sealed lithium batteries designed to last the entire lifespan of the device.

RADIO INTERLINKING:

When one alarm triggers, all connected alarms in the system will sound due to their wireless radio communication.

VARIETY OF DETECTION TYPES:

Includes smoke, heat, and carbon monoxide alarms to cover different fire hazards.

EASY TO INSTALL AND MANAGE:

Can be easily expanded to create a whole-home system with a control unit for testing and silencing.

HiSPEC HSSADAKRF10-PRO RF Deaf Aid Kit with Strobe & Vibrating Pad

Wirelessly interconnect with this mains powered (AC/DC Adaptor) deaf aid kit. It offers additional protection when sound alone may not be enough. It is compatible with HiSPEC RF10-PRO smoke, heat and/or CO alarms, and will detect a fault or low battery warning. Suitable for wall mounting with 2 screw fixings. Alerts via a flashing strobe light and a vibrating pad.

DOORBELLS & ACCESSORIES

WIREFREE DOORBELLS

Never miss a visitor with our wide range of Chimeflash, Honeywell, and Lisa Signolux doorbell systems. Explore our totally wirefree and wireless doorbells, either battery or mains powered, and ensure you never miss that important parcel or caller at your door again. You can use the portable chimes in whichever room you want, and you can move them from room to room as they are portable and built for your convenience.

TRANSMISSION

Please remember that building structures e.g. metal, uPVC door frames and thick walls may affect transmission.

HASSLE-FREE

There is no need to worry if your neighbour has an identical system, as our doorbells come with a simple coding system to ensure that it is only your system that rings.

THE RANGE

Where a range for a product is quoted - this is the maximum without obstructions.

- Dimmer switch
- AC power input
- Hour/minute button

PHONES AND A

CALLERS' VOICE TOO QUIET OR MUFFLED?

Do callers' voices seem very quiet or muffled over the telephone? In this section, you'll find a selection of telephones; some specially designed for people with hearing loss and/or suitable for anyone with hearing impairments. Whether you're at home, in the office, or out & about, our selection of desktop (corded), portable (cordless), & mobile phones will suit your needs.

AMPLIFICATION AND TONE CONTROL

All telephones in this catalogue have variable amplification and most have a tone control. A tone control is extremely useful when trying to improve clarity, boost the frequencies that are being lost, and achieve clearer conversations. A mute function allows you to have a private conversation at your end without the person on the phone overhearing your conversation.

CORDED PHONES

All the landline corded telephones in this catalogue feature an inductive coupler built into the handset, & they can be used with a hearing aid (must have the "T" Loop setting or Loop Program). Some portable/mobile phones can also be used with hearing aids. Phones with this facility are listed as 'Hearing Aid Compatible' (HAC). Neckloop or ear hooks are best to eliminate interference. Our Telephone Amplifiers for corded phones can be connected to almost all desktop phones, whether at home or in the office, to boost the volume & tone.

PORTABLE OR DECT PHONES

Portable or DECT phones allow you the freedom to have a phone anywhere around the house or in the garden. Many have good amplification and tone controls. Some have an answer phone that you can access through the handset and benefit from the amplification. They can be used with hearing aids without interference.

MOBILE PHONES

Our mobile phones are easy to use & are accessible by all, with amplification and hearing aid compatibility as well as a strong vibration. We have mobile phones that are designed specifically for older users, which are simpler and don't have all the bells and whistles of some of the more complicated devices.

ACCESSORIES

GLOSSARY OF TERMS...

SIM CARDS

All our mobiles are unlocked (not linked to any specific network) and can be used with most SIM cards; either Contract or Pay As You Go. SIM cards are not supplied with our phones but are widely available to suit your locality. If you have an existing phone, you may be able to simply swap the SIM into your new phone and keep your old phone number.

BLUETOOTH®

Bluetooth® technology allows connections between different devices without the need for wires, and has a useful range of up to 10m.

HEARING AID COMPATIBILITY

Please remember that some hearing aids are more immune to interference than others.

The amount and type of wireless signals transmitted by the phones can significantly vary, making it difficult to state which aids will work with which phones. However, we have found that the newer the hearing aid and the newer the phone, the less likely you are to have problems. You may find that you don't even need to use your "T" Loop setting or Loop Program - simply place the phone speaker as close to the hearing aid microphone as possible. A set of ratings exist to help users find mobile telephones that are suited for use with hearing aids.

AMPLIFICATION

Manufacturers often quote a dB amplification range for their phones, this is **not** the absolute output of a handset, it is the volume control range of the phone from a level that is not quoted. It is just a guide to output.

MOBILE PHONES

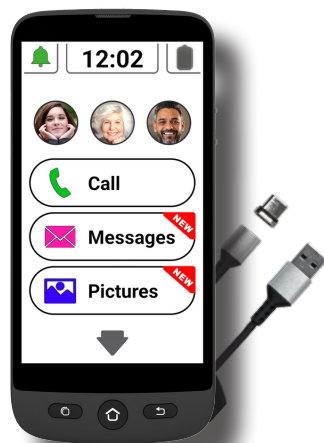

Our mobile phones are easy to use and accessible to all, with amplification and hearing aid compatibility, as well as a strong vibration. Designed with older users in mind, most Sarabec phones are simpler to use, and don't have all the bells and whistles of some of the more complicated devices.

NEW SWISSVOICE S510 SMARTPHONES

The all new Swissvoice S510 mobile phones are easy-to-use. The 4G smartphones come with an SOS button, large touch-screen buttons, 5 inch high-resolution display, and an extra-loud ringer. The phones are suitable for elderly, visually impaired, and hard of hearing people, and are also great for those with dexterity issues – almost no scrolling or swiping needed! These phones are also:

- M4/T4 hearing aid compatible.
- Designed with adjustable powerful ringer (up to 85dB) with a vibrating option.

NEW

- Speakerphone
- Redial function for last 10 outgoing calls
- Phonebook can store up to 50 names and numbers (4 of which have talking caller ID)
- Mute/Pause function

Geemarc CL595 Amplified Telephone

Order code **252-219**Price (Ex. Vat) **£74.99**Price (Inc. Vat) **£89.99**Colour **White**Size **220x200
x70mm**

Geemarc AmpliPower 40

One of the telephones with a high level of amplification, the AmpliPOWER 40 is a similar design to the CL100. It also has a bright flashing call indicator and greater choice of ringer volume and sounds. Designed to help those with considerable hearing loss and visual impairments.

- Amplification of up to +40dB
- Volume boost button
- Tone control for incoming speech with good boost for high frequency loss +/- 10dB
- Inductive coupler for hearing aid users with the "T" loop setting or program
- Hands-free speakerphone
- Ringer volume and tone choice controls
- 12 Number Memory
- Socket (2.5mm) for headset, neckloop, or ear hook use
- Socket for optional vibrating pad

Geemarc AmpliPower 40

Order code **252-194**
Price (Ex. Vat) **£62.49**
Price (Inc. Vat) **£74.99**

Colour **White**
Size **195x210x70mm**

Geemarc AmpliPower 50

Order code **252-195**
Price (Ex. Vat) **£83.32**
Price (Inc. Vat) **£99.98**

Colour **White**
Size **195x210x70mm**

Geemarc AmpliPower 50

Amongst telephones with the highest amplification the AmpliPOWER 50 is similar to the AmpliPOWER 40, but it is the loudest and clearest amplified telephone available, with a maximum 60dB amplification. It is designed to help those with a severe to profound hearing loss. Compatible with all hearing aids that have a telecoil facility.

- Amplification of up to +60dB
- Volume boost button
- Receiving tone control up to 10dB
- Inductive coupler for hearing aid with the "T" loop setting or program
- Hands-free speakerphone
- Bright call indicator light
- Ringer volume and tone choice controls
- Socket (2.5mm) for headset, neckloop, or ear hook
- 12 Number Memory
- Headset and shaker outputs

THE DIGITAL VOICE SWITCH-OVER

WHAT IS DIGITAL VOICE/DIGITAL SWITCHOVER?

Digital switchover refers to the process of transitioning from old, analogue landline telephone systems to a fully digital network. Digital Voice is a home phone service that uses a broadband connection to make and receive calls. It uses Voice over Internet Protocol (VoIP) to convert your voice into a digital signal that can be sent over the internet instead of traditional copper wires, essentially upgrading the entire landline system to a more modern digital infrastructure.

HOW IT WORKS

You plug your phone cable into your router, instead of directly into the wall. Digital Voice uses your broadband connection to make and receive calls.

WHY IT'S BEING IMPLEMENTED

The UK's current phone network will be retired and upgraded to digital (Digital Switchover) by the end of January 2027*. This transition is an important event, but one that impacts many sectors, especially the telecoms industry. Digital Voice will improve the quality of service and make it easier to connect to the internet.

WHAT IT MEANS FOR YOU

For most households, Digital Voice will have no impact on how you use your phone. You'll be given at least four weeks notice before you're switched over.

Note: Digital Voice won't work during a power cut.

RISK MANAGEMENT

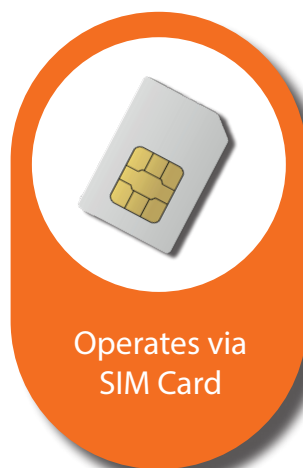

As the transformation of the phone networks continues, the reliability of analogue systems over digital phone lines is decreasing. That's why the transitioning to reliable digital solutions sooner rather than later is so important. The risks associated with delayed migration, such as increased failed call rates in analogue systems, could have dire consequences, particularly for vulnerable populations relying on analogue phone services.

ADDITIONAL TRANSITIONAL PRODUCTS

BT recently launched their Pre-Digital Phone Line (PDPL) to support certain customers during the migration period. Whilst the PDPL will mitigate against some of the challenges posed by the migration (Engineer Visits, Routers, Battery Backups not required), the challenge of the reliability of analogue Telecare protocols over the core IP network still remains. This is why much more testing of connectivity from PDPL lines to other networks has been carried out. The lifespan for the PDPL is until 2030 at the latest and this product is intended as a temporary 'Product of Last Resort' for problematic analogue to digital cases rather than a mainstream solution.

The Perfect Telephone for the Digital Voice Switch-Over

Introducing the CL9000 Corded Desktop Telephone; a great alternative to switching over to Digital Voice services, which are currently being rolled out. Now available from Sarabec.

A Landline Experience with a Touch of Mobile.

This phone uses a mobile phone signal to make and receive calls, so it can be placed anywhere in your home with no need to plug into a phone socket or router. The portable CL9000 works via SIM Card (not supplied), and is perfect for hard of hearing, d/Deaf, and elderly people.

CL9000 Corded Desktop Telephone

- Two ultra-thin speakers for comfortable use
- In-line volume control for effortless volume control.
- High quality stereo sound
- Speaker output: 4 ohm, 2-watt speakers
- Speaker Jack: 1/8" (3.5 mm) plug

LA90 PORTABLE INDUCTION LOOP SYSTEMS

The LA90 Portable Loop Systems provide a convenient solution for hearing aid users to listen more easily to conversation in noisy situations via the "T" Loop setting or Loop Program of their hearing aid. Used in reception areas, meeting rooms, interviews, checkouts, etc. for a 1:1 conversation when in noisy areas or where discretion is required.

A built-in microphone within the unit picks the sound up of the person speaking and transmits a loop signal to the hearing aid user. The speaker and hearing aid user must be within approximately 1m(3ft) of the unit. The hearing aid user will see a confidence light on the front of the unit to show them the system is operating, while the speaker will see an indication of their voice being transmitted. The Loop System transmits a signal both ways so both individuals can receive the signal equally well.

In a group setting, the system can be placed flat on a table, by the separate microphone, in front of the speaker.

LA90 Desktop Loop System

This system can be used with an external desktop microphone to enhance a person's speech. It also sends signals directly to the hearing aids & gives more discretion.

LA90 Desktop Loop System

Includes: LA90 Loop Amplifier, Desktop Microphone, Handset

Order code	137-102	Colour	Grey
Price (Ex. Vat)	£179.99	Size	200x185x70
Price (Inc. Vat)	£215.99		

LA90 Portable Induction Loop

A Portable loop amplifier with internal microphone, external microphone, and headphone socket (for users without the "T" Loop setting or Loop Program), volume control, replaceable NiMH battery pack, and mains power supply. The additional microphone picks up voices from both users and transmits clearly with less background noise. Battery life of approx. 6 hours from a 4-hour charge.

- Facility to fix amplifier to counter top or use Kensington lock
- Ear loop window stickers to advertise loop service

LA90 Portable Induction Loop

Ordering Information

ORDERING INFORMATION

You can view and order all of our products online at www.sarabec.com 24 hours a day 7 days a week. We use a secure ordering system to ensure the safety of your details.

If you wish to place your order by post or fax, simply tear out the order form overleaf and complete it with the details (product code, price, and quantity) of the products you require.

- If you are eligible for VAT relief, then, for each product required, you only pay the Excluding VAT price - You will need to complete the VAT Relief Certificate on the back of the order form.
- If a VAT exclusive price is not quoted for the product then the price including VAT must be paid.
- If paying by VISA, Mastercard, Maestro or AMEX Please complete the credit/debit card payment details.
- Post or fax your order to us.
- If paying by cheque, make it payable to 'Sarabec Ltd'. Enclose your payment with this order and post to us. Please note that cheques may take a few days to clear before goods are sent.

VAT

Throughout this catalogue you will find products that are priced Inclusive (Inc. VAT) and Exclusive (Ex. VAT) of VAT. VAT relief is not available on postage and packing.

If, in the description of each product we have detailed prices for both 'Including' and 'Excluding' VAT, that product is eligible for VAT relief. If an exclusive price is not shown, VAT relief is not available.

You are entitled to VAT relief if you are handicapped by a hearing disability. To benefit, simply complete the VAT Relief Certificate included in this catalogue. If you are unable to make this declaration, you must include the VAT in your order. When ordering online, simply tick the relevant section. VAT refunds cannot be given afterwards. If you are unsure, or want to know more, please contact us.

PAYMENT

You can pay by using a cheque or postal order payable to SARABEC Ltd or by using a credit card or debit card. If you wish to use a credit or debit card you may place your order and pay online via secure payment services or direct by telephone, fax or textphone.

TRIAL PERIOD

All products carry a one month trial period if purchased within the United Kingdom. You may return your products to us for any reason within one month of receipt and obtain a refund for your purchase provided that:

- You contact us first to let us know why you are returning the product
- The products are returned in good condition and in their original packaging; we may charge if products have been misused.
- The products have been used in accordance with the product instructions.

The cost of returning any product is your responsibility. We cannot accept responsibility for loss or damage to goods until they arrive safely at our offices. We advise you to return goods adequately packed and covered by insurance where appropriate.

DELIVERY

Products are normally available from stock and are despatched within 48 hours of receipt of your order. Delivery to UK mainland addresses normally takes up to **3 working days** from receipt of your order by us. Delivery is made through Royal Mail or independent carriers. A signature may be required on delivery of the product. Our delivery charges are for all UK mainland addresses, except the Channel Islands. For addresses outside this area please ask for delivery costs before ordering.

FURTHER INFORMATION

Some products in this catalogue may not be available for the whole life of the catalogue.

All personal information entered on the Order or VAT Relief forms will be treated as confidential as detailed in our Privacy Policy. You can ask for a copy of the Privacy Policy or obtain one from our website.

Our normal hours of business are: 8.15am to 4.45pm - Monday to Thursday, 8.15am to 4.00pm Friday.

Our Agreement With You

PRICES

Whilst we do our best to keep any price rises to a minimum, we reserve the right to increase our prices at any time. Should we do so, we will contact you on receipt of your order with details of the increase giving you the opportunity to cancel your order if you wish.

Should your payment not clear, then we may, in addition to any other rights we may have:

- Suspend delivery of the product ordered or any part of them until we receive cleared funds.
- Legally recover those products already delivered to you from you or your premises at any reasonable time and retain ownership.
- Pass on to you any charges we incur in obtaining clearance of your payment.

You will not own the products until your payment for them has cleared.

VAT

VAT is calculated at the prevailing rate at date of invoice. Should the prevailing rate of VAT change from that used in our publications, calculations will be based on new rates and charged to you accordingly.

DELIVERY

Delivery to UK addresses normally takes 3 working days from the date of despatch of your order by us. It is made through independent carriers. The independent carrier may require a signature from you on receipt of your order.

If you do not receive your order within 28 days of placing your order or should your order arrive damaged, please contact us as soon as reasonably practicable. Please retain the original packaging.

Additional postage charges may be payable for deliveries to non-UK addresses; please contact us for further details.

GUARANTEE

All our products are covered by our guarantee. You will invalidate the guarantee if:

- You use the products contrary to instructions supplied with them
- You cause any damage to the products through misuse or negligent use of them.

- If any product becomes damaged outside normal usage.
- For any consumables such as batteries.

If you wish to rely on this guarantee, we will, at our choice, either repair or replace the products or, if appropriate, any parts of them. If we are unable to carry out any of the above through no fault of our own we will refund the price you paid for the products.

In all circumstances, except for faulty goods, this guarantee shall not exceed the price you paid for the products in question. No other remedies are available.

OUR PRODUCTS

Full descriptions of our products are given in our current catalogue or online.

The products are only suitable for the intended uses described.

As a part of our continuing programme of product development, we reserve the right to improve and update product designs.

CANCELLATION

You may cancel your order anytime from when you place the order up to 10 working days after the date you received the goods but, to do so, you must notify us. We will respond confirming your cancellation and the date your notification was received. The date confirmed is the date the cancellation came into effect.

UNFORESEEABLE PROBLEMS

We are not responsible for delays outside our control (for example industrial dispute, act of God, inability to obtain raw materials) if this prevents or hinders our contract with you.

OUR AGREEMENT

An agreement is made between us once we have received and accepted your order.

Our agreement and any related matters are governed by English law. Your statutory rights are not affected. This agreement is a summary of our full Terms and Conditions of Sale and Supply; you can ask for a copy or obtain one from our website.
