# SARABEC'S HEARING SOLUTIONS

SARABEC® IS ONE OF THE UKS LEADING HEARING EXPERTS. WITH OVER 46 YEARS OF EXPERIENCE, WE AIM TO MAKE LIFE A LITTLE EASIER FOR THOSE WITH HEARING DIFFICULTIES BY PROVIDING HEARING PRODUCTS THAT INCREASE SOUND LEVEL, QUALITY, & CLARITY SO YOU CAN ENJOY SOUND AGAIN.

## WITH OUR HELP, YOU CAN:

Stay in touch with friends & relatives

Know what's happening around the house

Enjoy recreational time without feeling isolated

Whether you wear hearing aids or not, we provide solutions for customers & businesses alike, to help with:

**Listening** - Enjoy TV, radio, & conversations at a volume that doesn't disturb others, with better sound quality and clarity.

**Alerting** - Extra loud alerts, vibrations, & bright lights for doorbells, telephones, & alarms.

**Telephones** - Extra loud, easy-to-use amplified phones including corded, cordless, & mobiles.

### BUYING FROM SARABEC

Easily order online or over the phone, and get technical help when you need it (before OR after sales!) Don't forget to take advantage of our **FREE delivery!**

### 1 MONTH TRIAL

Be sure that the products you choose are right for you by trying them at home. If you decide it's not for you, get in touch and we can process the return & refund of the product. Refunds are not applicable if goods are returned damaged, incomplete or have been tampered with.

### VAT RELIEF

If you have hearing loss, you can obtain VAT relief on the products in this catalogue that have a green 'VAT relief' sticker, as shown below. See page 68 for more details on claiming VAT Relief. Note: Some accessories, if not bought as part of a system, cannot be given VAT Relief.

### EVERYDAY LIFE WITH A PACEMAKER

Pacemaker manufacturers provide instructions about possible interference from products that you should avoid. Please refer to your booklet about your type of pacemaker, or contact your pacemaker clinic. Further information is given on our website.

### SYMBOLS USED THROUGHOUT THIS CATALOGUE:

This product does not qualify for VAT Relief.

VAT Relief is available on this product.

Suitable for users with hearing aids that have the "T" Loop setting or Loop Program

04

## TV & AUDIO

- 04 Digital Wireless TV Listening Systems
- 06 Earis Premium TV Listeners
- 08 Induction Loop Systems
- 09 Digital Connection Converters
- 10 Bel Sono TV Amplifier

Have difficulty hearing your television, radio, Hi-Fi or other audio? Whether you wear hearing aids or not, our portable & fixed systems bring the wanted sound direct to your ears without disturbing others.

12

## BLUETOOTH & AURACAST

- 14 EarisMAX Auracast Range
- 16 Bluetooth TV Streamers & Accessories
- 18 Bluetooth for Mobile Phones
- 19 Sleep Headphones & Sound Players

Auracast Bluetooth (LE) Audio changes how we hear in homes & public venues, especially for hearing aid wearers. Connect hearing aids to bluetooth devices like phones or TV transmitters via the "T" Loop setting or Loop Program.

20

## PERSONAL LISTENING & COMMUNICATION

- 21 Personal Listeners
- 23 Personal Audio Accessories

Do you have difficulty hearing conversations at home or otherwise? Our conversation listeners can be used with or without hearing aids, so you never miss a word. Versatile and portable, you can take them anywhere. Available with headsets/headphones, & neckloops.

24

## HOME ALERTING

- 25 Lisa Signalux Home Alerting
- 34 Fireangel & HiSPEC Smoke/CO Alarms
- 36 Doorbells & Accessories
- 41 Geemarc Amplicall Baby Monitor
- 42 Alarm Clocks

Stay up-to-date with everyday events in the home or at work via loud alerts, vibrations and flashing lights, so you can "feel" and "see" the alerts. Get alerted to the ringing of the telephone or doorbell, the sound of the smoke or fire alarm or a baby crying.

48

## PHONES & ACCESSORIES

- 50 Mobile Phones
- 53 Portable DECT Telephones
- 58 Corded Desktop Telephones
- 60 Digital Voice Switch-over
- 62 Phone Accessories

If callers' seem very quiet or muffled on the phone, our telephones and amplifiers can help. *Note:* On page 61, you'll find products that let you know the phone is ringing.

64

## TINNITUS

- 65 Wellcare & Sound Oasis

Manage Tinnitus symptoms and reduce the effects of buzzing/ringing in your ears with our tinnitus relief products that create a relaxing atmosphere, reduce stress, and help you sleep.

66

## COMMERCIAL AUDIO

- 66 LA90 Portable Induction Loop

Accessibility & inclusion for large public spaces. We help improve communication for hearing impaired people in non-domestic environments like a church, village hall or any public space.

68

# TV & AUDIO

## TV & Audio

# sonumaxx<sup>NX</sup>

## HEAR THE TV CLEARLY WITH DIGITAL, WIRELESS TV LISTENING SYSTEMS

### WHAT IS A TV LISTENER?

TV listeners let you listen to your TV, radio or other audio device at a comfortable volume without disturbing others. Wireless TV Systems come with no trailing wires, allowing you to move freely while watching TV as they deliver sound wirelessly to your ears. (Note: You must still connect the transmitter to your sound source to pick up the sound using the leads provided).

Hearing aids with the "T" Loop setting or Loop Program can be connected to any of our products that have the symbol next to them. Sounds will be transmitted directly to your hearing aid, increasing intelligibility and significantly reducing background noise. Products without the T symbol are suitable for those who do not wear hearing aids.

### HOW DO TV LISTENERS WORK?

Digital listening systems use the 2.4GHz frequency to transmit their sound from the transmitter to the receiver. Their coding system means they are unlikely to suffer any form of interference. Multiple receivers can usually be used with a single transmitter. All TV Listeners require you to wear a receiver whether or not you use a hearing aid.

### IS A TV LISTENER RIGHT FOR ME?

Do you listen to the TV at a higher volume than others? Do you struggle to hear TV dialogue? If friends or family complain that your volume is too loud then our TV Listening systems can help. With wireless TV listeners, you can set the volume to max without disturbing others.

### TV LISTENERS FOR HEARING AID USERS

### SONUMAXX - A SIMPLE-TO-USE TV LISTENING SYSTEM FOR BOTH HEARING AID AND NON-HEARING AID USERS.

Listen more clearly to your TV, radio, or to conversations with friends or family! The Sonumaxx systems have a built-in microphone and amplifier function, allowing the user to tap into the receiver's microphone for a clearer, amplified conversation at the press of a button while watching TV. The system offers a 25m range while the headset systems boasts 125dB. Enjoy moving freely as the signal is not interrupted by walls.

### SONUMAXX SYSTEM COMPONENTS

The standard Headset System combines the headset and receiver unit into a single device. While the PR systems consist of two main parts; a mains powered transmitter and a receiver, which allows you to plug any audio listening accessory into it such as headphones, neckloop, ear hooks etc. The Sonumaxx systems are already paired for your convenience.

### BATTERY LIFE

A fully charged rechargeable battery takes 3 hours to charge and offers eight hours listening time depending on the volume used. 2 batteries are supplied to provide continuous listening.

Sonumaxx NX Headset Receiver			
Order code	230-417	Colour Size	Silver/Black Headset: 190x160x65mm
Price (Ex. Vat)	£64.91

# earis®

PREMIUM DIGITAL WIRELESS LISTENING

## WHAT IS EARIS PREMIUM WIRELESS LISTENING?

The Earis Premium System is a digital TV listening system that uses dynamic sound technology to deliver the highest sound quality and clarity available in TV listening equipment today - brilliant for people with or without hearing aids wanting to watch TV or just listen to music. The system is easy to use and is ready to connect to TV and audio systems.

## IMPROVED UNDERSTANDING OF SPEECH IN AUDIO

Earis Premium significantly improves understanding of speech in audio even if background sounds are present. You choose from the 5 selectable Tone Profiles you like, to create a personalised listening experience. The fast-acting Automatic Tone Profiling eradicates sudden changes in sound at the chosen listening level, which is especially useful when changing channels, or when adverts cut in.

## 5 UNIQUE TONE PROFILES

Through extensive research into the listening needs of hearing-impaired people, it has been determined that 5 unique tone profiles match the needs of 95% of users when listening to speech and/or music from film, TV, radio or any other sound source. Earis Premium delivers constant high quality sound using the profile chosen by you.

## SELECT FROM TWO EARIS PREMIUM LISTENING OPTIONS:

Both the headset receiver system and the PR Neckloop System use the same transmitter, which has connections and cables for digital audio and analogue audio signals that are typically present on all TV's and Sky, Virgin and Freeview boxes. The PR Neckloop System allows you to plug in your choice of listening device (headset/earphones/ear hooks etc).

### Earis Premium Digital Headset System

This headset receiver is ideal for people who do not wear hearing aids, or those who may not wish to wear their aids to watch TV or listen to music.

Earis Premium Digital Headset System	
Order code	230-190
Price (Ex. Vat)	£257.50
Price (Inc. Vat)	£309.00
Colour	Graphite/Silver
Size	Headset: 244x112x24mm

### Earis Premium Digital Neckloop System

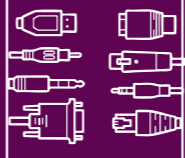

This neckloop system is ideal for hearing aid wearers who have a Loop or "T" program on their aids.

Earis Premium Digital Neckloop System	
Order code	230-191
Price (Ex. Vat)	£273.00
Price (Inc. Vat)	£327.60
Colour	Graphite/Silver
Size	Receiver: 63mmØx24mm

## BOTH SYSTEMS FEATURE:

		
Built-in receiver charging cradle and charging port for an optional second battery	Connection kit for TV and audio systems	Easy-to-use communication amplifier available at the press of a button on the receiver
		
Replaceable rechargeable battery, with fast full charge in under 2 hours - 80% in 30 minutes. (Full battery lasts approx. 8hrs).	Tone & Balance controls	Large tactile volume wheel with LED level display

## TV & Audio

## THE LIGHTWEIGHT CL7500 OPTI WIRELESS HEADPHONES DESIGNED FOR PEOPLE WITH LOW TO SEVERE HEARING LOSS.

Charge it on its base, using an external battery, or via your laptop in 6 hours. Works with televisions via digital optical or analogue output sockets, radios & DVD players.

### CL7500 OPTI Wireless Headphones

Order code	252-221	Colour	Silver/Black
Price (Ex. Vat)	£141.66	Size	Base: 205x130x75mm
Price (Inc. Vat)	£169.99		Headset: 190x160x65mm

- ✓ Built-in digital treble/bass adjustment (+/-10dB)
- ✓ **Amplification up to +125dB**
- ✓ Balance Control (left/right)
- ✓ Digital optical & analogue connections

INDUCTION LOOP SYSTEMS

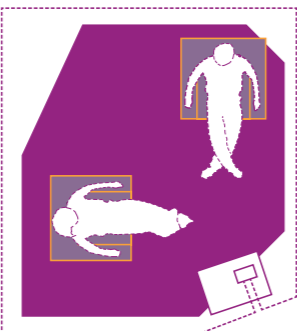

**WHAT IS AN INDUCTION LOOP SYSTEM?**

Induction loop systems transmit sound directly to a hearing aid's loop ("T") facility or program. The loop facility minimises distracting background noise, enhancing the sounds you want to hear. As the loop receiver facility is built into your hearing aid, you will not need to wear an additional receiver.

**HOW DOES IT WORK?**

A small amplifier is plugged into the television or sound source, using one of the supplied direct connection cables.

A very thin wire runs around the perimeter of the room to and from the amplifier. This wire can be positioned underneath carpet, laminate, or wood, or it can follow/attach to your skirting boards or picture rail, or be placed in a ceiling cavity or attic.

Some users feel that though they benefit from TV sound direct to their hearing aid, they feel cut off from other sounds like the doorbell or conversations. If this happens, you can ask your audiologist for an additional program which mixes the loop and

microphone together (often known as M/T or mixed loop and mic).

Once installed, and after you've selected your chosen volume/tone levels, there is hardly any interaction required with the amplifier.

*Not sure how to use the loop features of your hearing aid? Ask your audiologist as you may need to activate the features, or adjust the sensitivity of the loop program.*

Both the LA240 Room Loop and Loop Pad systems are supplied with leads that connect the amplifier directly to your TV with digital optical, phono and jack connectors, and they both come with a microphone that has a 1.2m lead (can be used for conversation or monitoring the telephone or doorbell ring). See next page for other connection possibilities.

**ROOM LOOP SYSTEM VS LOOP PAD SYSTEM:**

The room loop system will cover an entire room, and you will pick up the sound from the system wherever you are within the room. The loop pad system generates a very localised loop signal via its small loop pad which goes under a cushion or on the back of a chair. You will only pick up the signal while sitting in that one place.

**LA240 Room Loop System**

This system will cover an entire room.

<b>LA240 Room Loop System</b>	
40 metres (approx 130ft) of thin, white loop cable (2.5mm diameter) and cable clips	
Order code	<b>135-250</b>
Price (Ex. Vat)	<b>£142.50</b>
Price (Inc. Vat)	<b>£171.00</b>
Colour	<b>Silver</b>
Size	<b>180x140x42</b>

**LA240 Loop Pad System**

Ideal for a single person or where a limited loop field is required. (Supplied with 5m (15ft) connecting lead.

<b>LA240 Loop Pad System</b>	
This LA240 system includes a pad in place of the cable reel.	
Order code	<b>135-255</b>
Price (Ex. Vat)	<b>£142.50</b>
Price (Inc. Vat)	<b>£171.00</b>
Colour	<b>Silver</b>
Size	<b>180x140x42</b>

**DIGITAL CONNECTION CONVERTERS**

**Dolby Digital Audio Decoder Kit**

A clever little device which will, in most cases, allow you to connect any of our Television Listening Systems (LA240, Sonumaxx & Earis) to any television, set top box, or audio output device without needing to change the settings on the television to output PCM signals. This is especially useful when the television or other audio source doesn't auto switch to PCM output or when you cannot find the appropriate settings in the menu systems.

<b>Dolby Digital Audio Decoder Kit</b>	
Order code	<b>354-132</b>
Price	<b>£29.99 Inc. Vat</b>
Colour	<b>Black</b>
Size	<b>105 x 75 x 25mm</b>

**Sarabec HDMI ARC Audio Extractor Kit**

If connecting to your television using our ARC Audio extractor then you must ensure that the HDMI socket you connect to is marked as HDMI ARC or HDMI eARC. If after connecting your equipment to the television via the ARC Audio extractor you do not get a sound output, or the sound you get is distorted then please change your televisions audio output settings to PCM, STEREO or AUTO instead of Dolby Digital.

**N.B** Connection via the eARC socket will in most cases cut out the internal speakers from the television. *This item can also be used in place of a Digital Audio Converter for use with older equipment that doesn't have an optical socket. Some televisions auto switch this function, most do not.*

<b>HDMI ARC Audio Extractor Kit</b>	
Order code	<b>354-130</b>
Price	<b>£39.98 Inc. Vat</b>
Colour	<b>Black</b>
Size	<b>100 x 70 x 25mm</b>

**COMMON SOCKET TYPES**

<b>Optical/SPDIF/Digital Audio/TOSLink</b> Preferred connection method, will generally require a change to the TV or connected equipment to PCM audio output.	
<b>HDMI</b> Can be used in conjunction with the Sarabec ARC Audio Converter.	
<b>PHONO/RCA</b> Can be a good option, but make sure that the RCA sockets are marked as Audio Output and NOT Audio Input.	
<b>3.5mm Audio/Headphone</b> A good method of connecting. However, in most cases, using this socket will turn off the internal speakers of the television.	

# BEL-SONO WIRELESS TV SOUND AMPLIFIER

A convenient alternative to traditional headphones & hearing aid adjustments. Provides targeted sound where needed.

## 1 WIRELESS TV SPEAKER

The Humantechnik Bel-Sono is a specialised, portable wireless TV speaker, that enhances speech in TV entertainment, for a better, more relaxing listening experience.

## 3 AI SOUND PROCESSING

Featuring AI-powered sound processing to identify and amplify voices to make dialogue clearer and improve sound clarity.

## 5 COMPLETELY PORTABLE

Equipped with a carrying handle, users can place the wireless speaker directly next to them for personalised audio.

## 2 DESIGNED FOR HEARING LOSS

Designed for individuals with declining hearing loss. Users can choose from three levels to tailor the sound to their specific hearing needs.

## 4 NO BACKGROUND NOISE

Uses AI technology to reduce loud background noises like music or explosions so you can enjoy clearer dialogue.

## 6 EASY SETUP AND USE

Simple to set up, the base station acts as both a transmitter and a charging dock, and connects easily to the TV.

# COMPLETELY PORTABLE TV AMPLIFIER

### Humantechnik Bel-Sono Wireless TV Amplifier

Order code	230-290	Colour	Dark Grey
Price (Ex. Vat)	£165.00	Size	Speakers: 22 x 10 x 9 cm Charging station: 20 x 2.5 x 8.2 cm
Price (Inc. Vat)	£198.00		

## AI-POWERED DIALOGUE ENHANCEMENT

# BLUETOOTH & AURACAST

**AURACAST, A REVOLUTIONARY FEATURE OF BLUETOOTH LOW ENERGY (LE) AUDIO WILL CHANGE HOW WE HEAR IN HOMES AND PUBLIC VENUES. IT'S A GAME CHANGER FOR HEARING AID WEARERS WHO USE BLUETOOTH WITH THEIR DEVICES.**

**WHAT IS BLUETOOTH?**

A short range wireless technology that allows devices to wirelessly communicate without cables or cords. Bluetooth is everywhere; on your TV, playing music in the car, an audio book through earphones, & even taking phone calls via hearing aids.

**BLUETOOTH FOR HEARING AIDS**

Bluetooth was first introduced for hearing aids in 2005 by hearing aid manufacturer, Starkey. Years later, iPhone and Google created a Bluetooth feature, that allowed users to connect devices to their hearing aids via their device settings. But hearing manufacturers wanted more for their cochlear implant & hearing aid users.

**THE SETBACKS OF THE CURRENT BLUETOOTH**

Bluetooth has a short transmission range of 30 feet, so distance from the device can weaken the signal & cause users to hear crackling. With Bluetooth, you can stream to a car stereo, headphones, or hearing aids, but never all three at the same time. Bluetooth Low Energy Audio aims to change that.

**WHAT IS BLUETOOTH 5.3 LE AUDIO?**

Bluetooth 5.3 LE (Low Energy) Audio is the new standard protocol that hopes to make it easier for users to connect hearing aids to devices.

**BETTER SOUND QUALITY, CLARITY, TRANSMISSION RANGE, & BATTERY LIFE**

This Low Energy Bluetooth sends better quality audio signals from one device to another. It is predicted to improve sound quality & clarity, while significantly reducing the battery drainage of your headphones/hearing aids.

**WHAT IS AURACAST?**

Auracast transforms how we experience audio in the home. It allows multiple users to connect to a single audio source, like a TV, sound system, etc. at the same time using their own Bluetooth devices (hearing aids, Bluetooth headphones, wireless earbuds, etc). This avoids traditional Bluetooth

limitations like the 1:1 connection. Whether you're enjoying a movie night with family or listening to music, Auracast makes it easier, more flexible, and more enjoyable to access audio with personalised control over the volume and sound for each person. It's a breakthrough that enhances convenience, accessibility, and the overall listening experience for everyone in the household.

**ACCESSIBILITY FOR HEARING AID USERS**

Auracast is a game-changer for individuals with hearing aids. The direct audio feed from the TV or audio system eliminates the need for external microphones or hearing loops. This direct connection ensures clearer, better quality sound.

**HOW WILL AURACAST SHAPE LISTENING TO TELEVISION AND AUDIO IN THE HOME?**

**MULTIPLE LISTENERS, PERSONALIZED AUDIO**

Auracast enables friends or families to watch TV or listen to music without sharing headphones or using splitters. This is especially convenient for those wanting to enjoy high quality audio without compromising on comfort or worrying about disturbing others.

**ENHANCED SOUND QUALITY AND RANGE**

Bluetooth LE Audio improves sound clarity and extends the range of audio transmission to 300 feet, unlike traditional Bluetooth (approx. 30 feet). This means users can move freely around the house without the signal dropping, and continue listening as they go about their tasks. This means that no matter if you're sitting in the living room or moving around the house, you will still experience a more immersive home entertainment experience.

**REDUCED BACKGROUND NOISE & DISTRACTIONS.**

When using Auracast, you can turn off the TV speakers to reduce background noise in the house. Late-night TV watchers can enjoy their shows without disturbing others, & parents can prioritise tasks while the kids watch their show.

**SIMPLIFIED SETUP AND COMPATIBILITY**

Setting up Auracast is straightforward now that most modern devices support Bluetooth LE Audio. First, ensure your audio source has an Auracast-enabled transmitter. Then easily connect and stream audio to multiple devices by selecting the audio source from your device's settings.

## BLUETOOTH 5.3 FEATURES:

				
<b>IMPROVED POWER EFFICIENCY</b>	<b>ENHANCED SECURITY</b>	<b>FASTER CONNECTIONS</b>	<b>HIGHER DATA TRANSFER RATES</b>	<b>BETTER INTERFERENCE MANAGEMENT</b>
Devices can last longer on a single charge. (Great for hearing aids, wearables and IoT devices).	Safer connections, protecting your data from unauthorized access.	Quicker, more reliable pairing, reducing the time it takes to connect devices.	Faster data transfer, enabling smoother streaming and quicker file sharing.	Improvements mean more stable connections even in environments with many wireless signals.

## AURACAST FEATURES:

				
<b>MULTI-DEVICE AUDIO SHARING</b>	<b>ENHANCED AUDIO QUALITY</b>	<b>SEAMLESS BROADCASTING</b>	<b>ACCESSIBILITY FEATURES</b>	<b>VERSATILE APPLICATIONS</b>
Multiple users can connect to an audio source simultaneously, perfect for shared listening experiences in public or private settings.	Supports higher quality audio streaming, providing a richer, immersive listening experience.	Seamlessly broadcasts audio to multiple devices, making it ideal for events, museums, & educational settings.	Hearing aids & other assistive devices can directly receive audio broadcasts, improving accessibility for those with hearing impairments.	From personal entertainment to professional uses, Auracast offers versatile applications, making it a game-changer in wireless audio technology.

**Bluetooth & Auracast**

# earisMAX: AURACAST-ENABLED DEVICES

## earisMAX Auracast & Bluetooth 5.3 LE Transmitter

Elevate your audio experience with the earisMAX Bluetooth® Auracast™ transmitter, your gateway to seamlessly connecting non-Bluetooth audio sources to Bluetooth-enabled devices like headphones and hearing aids. It has optical, HDMI and analogue audio connections, and is very easy to setup and use.

### earisMAX Auracast & Bluetooth LE 5.3 Transmitter

Order code	<b>230-275</b>	Colour	<b>Black</b>
Price (Inc. Vat)	<b>£143.99</b>	Size	<b>100 x 70 x 20mm</b>

## earisMAX Wireless Charging Cradle

A wireless charging stand for the earisMAX headphones. This convenient stand means that you do not need to plug the headphones in to charge them up - they can simply be placed on the cradle. This will also help to extend the life of the headphones as the headphones charging socket will not be damaged or stretched out.

### earisMAX Wireless Charging Cradle

Order code	<b>230-276</b>	Colour	<b>Black</b>
Price (Inc. Vat)	<b>£86.99</b>		

## earisMAX Headphones (Bluetooth 5.3 LE & Auracast)

These Auracast™-enabled headphones receive all of your favourite audio streams, whether it's single-channel Bluetooth® Classic, two-channel Bluetooth® LE Audio, or broadcast audio via Auracast™. Pair with the earisMAX transmitter to get the best sound experience possible.

### earisMAX Headphones (Bluetooth 5.3 LE & Auracast)

Order code	<b>230-274</b>	Colour	<b>Grey</b>
Price (Inc. Vat)	<b>£239.99</b>	Size	<b>170 x 192 x 82 mm</b>

## earisMAX Bluetooth/Auracast Microphone

The earisMAX Auracast™ streaming microphone is small in size but big in performance. Simply clip to clothing, hold in your hand or place on a surface to pick up a voice or other sound source. It sends the audio signal to any bluetooth or auracast-enabled receiving device like the earisMAX headphones.

### earisMAX Bluetooth/Auracast Microphone

Order code	<b>230-277</b>	Colour	<b>Black</b>
Price (Inc. Vat)	<b>£105.59</b>		

## AURACAST-ENABLED earisMAX DEVICES

NOW AVAILABLE

EarisMAX devices feature Auracast™ and Bluetooth LE protocols, offering the ultimate listening experience with ultra-low latency & the ability to tune the sound output to your audiogram.

# EARISMAX HEARING AID BUDS

## 1 HEARING AID EARBUDS

Bridge the gap between high quality audio and personalised hearing enhancement devices with these hearing aid earbuds.

## 2 FOR HEARING LOSS

Designed for individuals with hearing loss who want an all-in-one solution for streaming media, phone calls, & hearing amplification **without the stigma of traditional hearing aids.**

## 3 PERSONALISED AUDIOGRAM

The EarisMax Buds amplify sound and allow you to personalise your audiogram.

## 4 WIRELESS & PORTABLE

Hear TV, hands-free calls & conversations clearly with the compact, wireless earbuds. Ideal for home, travel, & everyday use.

Price (Ex. Vat)	£44.80	Size	63mmØ x 66mm
Price (Inc. Vat)	£53.76		

# PERSONAL LISTENING & COMMUNICATION

## LISTENING TO CONVERSATION

### PERSONAL LISTENERS

If you have difficulty catching everything that is said in conversation you may benefit from using one of our Personal Listeners which amplify the sounds you want to hear and brings them closer to your ears.

### HOW TO USE A PERSONAL LISTENER?

You can use a personal listener for conversation with friends or at work where you might find listening in a group or noisy situations stressful. Then, later in the day, you can use it to relax & listen to TV, radio, & music on your device or computer.

### CHOOSE THE WAY YOU WANT TO LISTEN

Choose between headphones, headset or earphones, or use your hearing aid on the "T" Loop setting or Loop Program with a neckloop or ear hook. Your hearing aid may have the "T" (loop) facility. With this, you can enhance your listening by making more of your hearing aid. Sounds will be transmitted directly to your hearing aid, significantly reducing background noise.

### SARABEC QUALITY

Sarabec® audio products provide clear, sharp sound reproduction leading to relaxed, stress free listening. These versatile products allow you to connect directly to various types of audio & visual equipment.

## Personal Listening

Sarabec

## PERSONAL LISTENERS CRESCENDO 60 RANGE

### WHAT IS THE CRESCENDO PERSONAL LISTENER?

The Crescendo 60 personal listeners will amplify conversation, or even the sound of television & audio, allowing you to listen at a volume that is comfortable for you. There is now no need to have the television or radio volume at a level that will disturb your family, friends or neighbours. You can take part in conversation with the help of the Crescendo which transmits the sounds clearly into your ears, effectively improving your

overall listening experience.

### FOR USE WITH THE TV & FOR CONVERSATION

The Crescendo Personal Listener is a portable listener which is light and comfortable to use. For conversation, use the plug-in microphone to pick up the sound. For use with a TV or radio either a microphone or direct connection lead is used to pick up the sound. The Crescendo Personal Listener requires no technical knowledge to assemble, simply plug the accessories into the appropriate sockets and it is ready to use.

### WHAT DO THE CRESCENDO SYSTEMS OFFER?

The range of systems listed allows you to choose a complete ready-to-use system, especially suited to your needs.

Some of the features of the Crescendo 60's include:

- A rotary volume control
- A rotary tone control (to boost high or low tones)
- An indicator "on" light with a low battery warning
- Mode selection microphone, direct input & loop pickup
- 2 AA alkaline batteries (supplied) for up to 60hrs use
- Belt clip & Neck cord
- A plug-in microphone for 1:1 communication
- Additional microphone (1.2m lead & tie-clip supplied) in case microphone needs to be placed closer to the sound source.
- Velcro pads for attaching the additional microphone to a loudspeaker grille
- A 3m extension for microphone or other listening option.

# HOME ALERTING

Alerting - Telling you what's happening

Telephone (voice): 01642 247789  
 Fax: 01642 230827 Textphone (NGTS): 18001 07497 242 294

www.sarabec.com  
 Email: mail@sarabec.co.uk

## WHAT ARE ALERTING DEVICES?

Alerting devices make you aware of everyday occurrences at home or at work. Never miss the telephone ring, doorbell, alarm clock, the sound of the smoke or fire alarm, or your baby crying. Either "feel" these alerts via a vibrating pad or "see" them via a bright flashing light. with our alerting devices.

## THE COMPLETE HOME ALERTING SYSTEM

Sarabec's full home alerting systems can be tailored to your needs - meaning a single receiver device will warn you of all the events mentioned above. Add additional receivers to for added flexibility & peace of mind.

## SMOKE ALARM SYSTEMS

Smoke alarm systems are invaluable to hard of hearing people, particularly at night once hearing aids are removed. Benefit from a system with a vibrating pad and flashing strobe for independence and security.

## DOORBELL SYSTEMS

A range of totally wire-free doorbells, either battery or mains powered, means that you won't miss that important parcel or caller at your door. You can use the portable chimes in whichever room you choose, and the battery powered chimes can be taken into the garden or shed.

## TELEPHONE SYSTEMS

Do you struggle to hear the phone ringing? No matter if you're at work, in a noisy workshop, watching TV in your lounge, Sarabec's telephone alerting products can help keep you alerted so you never miss that important call.

## ALARM CLOCKS

Getting up in the morning can be a chore for anyone, but if you have difficulty hearing the alarm, or if you are worried about sleeping in, a little assistance from a vibrating pad and/or a flashing light can help keep you on track.

## Home Alerting

# THE LISA SIGNOLUX ALERTING RANGE

Get alerted to events around the home for complete home safety & peace of mind. Explore Lisa Signolux Systems, transmitters, receivers, accessories & batteries.

The Lisa Signolux is a simple, efficient, & cost effective home alerting solution, that includes alerting features found on more expensive systems, designed to be the affordable solution for deaf & hard of hearing people.

Get alerted to sounds around the home. with receivers that alert you via loud sounds, bright flashing lights, icons, & or vibrations.

Easy to set up, the system uses only two universal transmitters to keep installation as simple as possible. Select from an audio transmitter that uses microphones to detect sound, or a direct transmitter that connects to existing devices around the house. Stay alerted to the telephone ringing, the doorbell, baby monitor, intercom, and more with Lisa Signolux.

## FEATURES AND BENEFITS:

All receivers are wireless, offering easy wireless installation between transmitters & receivers. They come with either a vibrating pad, plug-in strobe receiver for bright flashing lights, coloured indicators, or loud sound alerts.

Receivers have either 6 or 8 coloured icons to help you identify the source of the sound. Up to 8 transmitters (sound detectors) can be coded to each icon.

Additional receivers & transmitters can be added to your system as required. Completely portable, they can be carried around for use in & around the house. They offer:

- Choice of 15x loud sounds up to 90dB output
- Secure coding system avoids interference from neighbouring systems
- Operating range of up to 200m
- Portable pocket or clip-on vibrating receiver
- Battery operated with mains adaptor option
- Batteries included with the kits where necessary

## LISA SIGNOLUX TRANSMITTERS

### Lisa Signolux Audio Universal Transmitter

Used to pick up audio signals from different sources such as a baby crying, an existing doorbell, an intercom system or the telephone ringing.

### Lisa Signolux Audio Universal Transmitter

Order code	<b>230-720</b>	Colour	<b>White</b>
Price (Ex. Vat)	<b>£62.10</b>	Size:	<b>122x75x38mm</b>
Price (Inc. Vat)	<b>£74.52</b>		

### Lisa Signolux Direct/Phone Universal Transmitter

Used to alert the user to the telephone ringing (by plugging into a BT socket), can be used to wire into an existing hard-wired doorbell system, alarm panel or water level indication.

### Lisa Signolux Direct/Phone Universal Transmitter

Order code	<b>230-721</b>	Colour	<b>White</b>
Price (Ex. Vat)	<b>£62.10</b>	Size:	<b>122x75x38mm</b>
Price (Inc. Vat)	<b>£74.52</b>		

### Lisa Signolux Sound Monitor Transmitter

The Lisa Signolux Sound Monitor is capable of learning 3 different sounds such as tones from timers, ringtones, alarm, sounds from CO2-detectors & smoke alarms etc. Once learned, the system then transmits these sounds as alerts via a Lisa Signolux receiver.

### Lisa Signolux Sound Monitor Transmitter

Includes: Rechargeable Batteries, and Charger

Order code	<b>230-718</b>	Colour	<b>White</b>
Price (Ex. Vat)	<b>£144.99</b>	Size:	<b>122x75x38mm</b>
Price (Inc. Vat)	<b>£173.99</b>		

### Lisa Signolux Baby Alarm

The new & improved Baby Transmitter for the Lisa Signolux system detects a baby's cry via a built-in microphone, & features a jack for an external wired microphone to suit all room layouts. The microphone's sensitivity can be easily adjusted and the transmitter has a trigger delay that can be set from 0 to 15 seconds.

### Lisa Signolux Baby Alarm

Order code	<b>230-738</b>	Colour	<b>White</b>
Price (Ex. Vat)	<b>119.99</b>	Size:	<b>122x75x38mm</b>
Price (Inc. Vat)	<b>£143.99</b>		

## LISA SIGNOLUX BELLPUSH

### Lisa Signolux Bell Push / Person Call Button

A vertical door bell push for the Lisa Signolux system which can be used at either the front or back door, or works well as a personal call button. The push features a red confidence light and can be wall-mounted using the supplied double-sided adhesive fixing strip.

### Lisa Signolux Bell Push / Person Call Button

Bell push with CR2032 battery

Order code	<b>230-710</b>	Colour	<b>White/Grey</b>
Price (Ex. Vat)	<b>£28.99</b>	Size:	<b>80x40x16mm</b>
Price (Inc. Vat)	<b>£34.79</b>		

### Lisa Signolux Bell Push Landscape/ Person Call Button

The Lisa Signolux wireless landscape Bell Push can be used as an additional Doorbell Push for a Lisa Signolux Visual Alert System or as a replacement. Can also be used in a carer/patient scenario.

- Weather resistant to IP55
- LED Confidence Light
- Name Plate

### Lisa Signolux Bellpush Landscape/ Person Call Button

Landscape bell push with CR2032 battery and name card

Order code	<b>230-711</b>	Colour	<b>Grey/White</b>
Price (Ex. Vat)	<b>£28.99</b>	Size:	<b>80x40x16mm</b>
Price (Inc. Vat)	<b>£34.79</b>		

# Home Alerting

## LISA SIGNALUX DETECTORS

### Lisa Signolux Guardian Interlink Smoke Detector

The Lisa Signolux Guardian Smoke Detector can link seamlessly to a Lisa Signolux receiver or many receivers. The interlink function means that all Lisa Signolux detectors will sound all at once when triggered. Sealed battery provides upto 10 years of power.

It operates as a standard smoke alarm, but also sends a wireless signal to a Lisa Signolux Receiver so that a user may be alerted by loud sounds, visual indications and vibrations.

- Self-testing function
- Warning given at low battery level
- Loud alarm tone
- Easy to install and set-up

**Note:** The Interlink Carbon Monoxide Detector can help extend the system further & offer extensive coverage.

<b>Lisa Signolux Guardian Interlink Smoke Detector</b>	
Order code	<b>230-729</b>
Price (Ex. Vat)	<b>£104.99</b>
Price (Inc. Vat)	<b>£125.99</b>
Colour	<b>White</b>
Size:	<b>95mmØx50mm</b>

### Lisa Signolux Interlink CO Carbon Monoxide / Heat Detector

This Lisa Signolux Interlink combined carbon monoxide and temperature detector can be used in areas unsuitable for regular smoke detectors. The use of regular smoke detectors with optoelectronic sensor technology (smoke particle detection) can increasingly lead to false alarms.

The new combined Lisa Signolux Interlink CO Carbon Monoxide/Heat Detector detects and reports elevated carbon monoxide levels in the room air at an early stage, and also reacts when the room temperature exceeds a limit of 60 °C. Particularly great for rooms with fireplaces, garages, or in areas in which there are fuel-operated devices and where incomplete combustion processes cannot be ruled out, or where there is a risk that harmful smoke gases, especially carbon monoxide, can spread.

<b>Lisa Signolux Interlink CO Carbon Monoxide/Heat Detector</b>	
Order code	<b>230-730</b>
Price (Ex. Vat)	<b>£104.99</b>
Price (Inc. Vat)	<b>£125.99</b>
Colour	<b>White</b>
Size:	<b>95mmØx50mm</b>

### Lisa Signolux Alarmo 2 Detector

When an independent smoke alarm sound is detected, Alarmo transmits a radio signal to all Lisa Signolux receivers within range, which then alerts you to the event.

There is no need to replace your smoke alarm because Alarmo can detect the alarm sounds from existing smoke alarms without the need for any modification or wiring.

It incorporates a highly intelligent processor which listens out for a typical domestic smoke alarm sound, and is therefore extremely good at not creating false alerts.

<b>Lisa Signolux Alarmo 2 Detector</b>	
Order code	<b>230-727</b>
Price (Ex. Vat)	<b>£144.99</b>
Price (Inc. Vat)	<b>£173.99</b>
Colour	<b>White</b>
Size:	<b>112x95x38mm</b>

# DOORBELLS & ACCESSORIES

## WIREFREE DOORBELLS

Never miss a visitor with our wide range of Chimeflash, Honeywell, and Lisa Signolux doorbell systems. Explore our totally wirefree and wireless doorbells, either battery or mains powered, and ensure you never miss that important parcel or caller at your door again. You can use the portable chimes in whichever room you want, and you can move them from room to room as they are portable and built for your convenience.

### TRANSMISSION

Please remember that building structures e.g. metal, uPVC door frames and thick walls may affect transmission.

### HASSLE-FREE

There is no need to worry if your neighbour has an identical system, as our doorbells come with a simple coding system to ensure that it is only your system that rings.

### THE RANGE

Where a range for a product is quoted - this is the maximum without obstructions.

### Sarabec Chimeflash Doorbell & Bellpush

The extra loud (Up to 100dB) wireless doorbell lets you choose how you would like to be alerted, either by sound, flash, or sound and flash together. You can take the portable doorbell with you, whether you're in the kitchen, living room, or even out in the garden! Its impressive transmission range (up to 300m) gives you peace of mind so you know when someone is at your door.

#### Sarabec Chimeflash Doorbell & Bellpush

- Dimmer switch
- AC power input
- Hour/minute button

# PHONES AND ACCESSORIES

## CALLERS' VOICE TOO QUIET OR MUFFLED?

Do callers' voices seem very quiet or muffled over the telephone? In this section, you'll find a selection of telephones; some specially designed for people with hearing loss and/or suitable for anyone with hearing impairments. Whether you're at home, in the office, or out & about, our selection of desktop (corded), portable (cordless), & mobile phones will suit your needs.

## AMPLIFICATION AND TONE CONTROL

All telephones in this catalogue have variable amplification and most have a tone control. A tone control is extremely useful when trying to improve clarity, boost the frequencies that are being lost, and achieve clearer conversations. A mute function allows you to have a private conversation at your end without the person on the phone overhearing your conversation.

## CORDED PHONES

All the landline corded telephones in this catalogue feature an inductive coupler built into the handset, & they can be used with a hearing aid (must have the "T" Loop setting or Loop Program). Some portable/mobile phones can also be used with hearing aids. Phones with this facility are listed as 'Hearing Aid Compatible' (HAC). Neckloop or ear hooks are best to eliminate interference. Our Telephone Amplifiers for corded phones can be connected to almost all desktop phones, whether at home or in the office, to boost the volume & tone.

## PORTABLE OR DECT PHONES

Portable or DECT phones allow you the freedom to have a phone anywhere around the house or in the garden. Many have good amplification and tone controls. Some have an answer phone that you can access through the handset and benefit from the amplification. They can be used with hearing aids without interference.

## MOBILE PHONES

Our mobile phones are easy to use & are accessible by all, with amplification and hearing aid compatibility as well as a strong vibration. We have mobile phones that are designed specifically for older users, which are simpler and don't have all the bells and whistles of some of the more complicated devices.

## GLOSSARY OF TERMS...

### SIM CARDS

All our mobiles are unlocked (not linked to any specific network) and can be used with most SIM cards; either Contract or Pay As You Go. SIM cards are not supplied with our phones but are widely available to suit your locality. If you have an existing phone, you may be able to simply swap the SIM into your new phone and keep your old phone number.

### BLUETOOTH®

Bluetooth® technology allows connections between different devices without the need for wires, and has a useful range of up to 10m.

### HEARING AID COMPATIBILITY

Please remember that some hearing aids are more immune to interference than others.

The amount and type of wireless signals transmitted by the phones can significantly vary, making it difficult to state which aids will work with which phones. However, we have found that the newer the hearing aid and the newer the phone, the less likely you are to have problems. You may find that you don't even need to use your "T" Loop setting or Loop Program - simply place the phone speaker as close to the hearing aid microphone as possible. A set of ratings exist to help users find mobile telephones that are suited for use with hearing aids.

### AMPLIFICATION

Manufacturers often quote a dB amplification range for their phones, this is **not** the absolute output of a handset, it is the volume control range of the phone from a level that is not quoted. It is just a guide to output.

**NEW DORO PHONES**

**Easy-to-use Doro mobile phones, designed with seniors in mind.**

Doro mobiles are extra loud & offer clear, crisp sound. Most have large separated keys or big buttons, & a high visual contrast, making them easier to use than other phones.

Price (Inc. Vat)	£99.98
Colour	White
Size	195x210x70mm

# THE DIGITAL VOICE SWITCH-OVER

## WHAT IS DIGITAL VOICE/DIGITAL SWITCHOVER?

Digital switchover refers to the process of transitioning from old, analogue landline telephone systems to a fully digital network. Digital Voice is a home phone service that uses a broadband connection to make and receive calls. It uses Voice over Internet Protocol (VoIP) to convert your voice into a digital signal that can be sent over the internet instead of traditional copper wires, essentially upgrading the entire landline system to a more modern digital infrastructure.

## HOW IT WORKS

You plug your phone cable into your router, instead of directly into the wall. Digital Voice uses your broadband connection to make and receive calls.

## WHY IT'S BEING IMPLEMENTED

The UK's current phone network will be retired and upgraded to digital (Digital Switchover) by the end of January 2027\*. This transition is an important event, but one that impacts many sectors, especially the telecoms industry. Digital Voice will improve the quality of service and make it easier to connect to the internet.

## WHAT IT MEANS FOR YOU

For most households, Digital Voice will have no impact on how you use your phone. You'll be given at least four weeks notice before you're switched over.

*Note: Digital Voice won't work during a power cut.*

## RISK MANAGEMENT

As the transformation of the phone networks continues, the reliability of analogue systems over digital phone lines is decreasing. That's why the transitioning to reliable digital solutions sooner rather than later is so important. The risks associated with delayed migration, such as increased failed call rates in analogue systems, could have dire consequences, particularly for vulnerable populations relying on analogue phone services.

## ADDITIONAL TRANSITIONAL PRODUCTS

BT recently launched their Pre-Digital Phone Line (PDPL) to support certain customers during the migration period. Whilst the PDPL will mitigate against some of the challenges posed by the migration (Engineer Visits, Routers, Battery Backups not required), the challenge of the reliability of analogue Telecare protocols over the core IP network still remains. This is why much more testing of connectivity from PDPL lines to other networks has been carried out. The lifespan for the PDPL is until 2030 at the latest and this product is intended as a temporary 'Product of Last Resort' for problematic analogue to digital cases rather than a mainstream solution.

Price (Inc. Vat)	<b>£20.39</b>	Size <b>126x63x20mm</b>

## LA90 PORTABLE INDUCTION LOOP SYSTEMS

The LA90 Portable Loop Systems provide a convenient solution for hearing aid users to listen more easily to conversation in noisy situations via the "T" Loop setting or Loop Program of their hearing aid. Used in reception areas, meeting rooms, interviews, checkouts, etc. for a 1:1 conversation when in noisy areas or where discretion is required.

A built-in microphone within the unit picks the sound up of the person speaking and transmits a loop signal to the hearing aid user. The speaker and hearing aid user must be within approximately 1m(3ft) of the unit. The hearing aid user will see a confidence light on the front of the unit to show them the system is operating, while the speaker will see an indication of their voice being transmitted. The Loop System transmits a signal both ways so both individuals can receive the signal equally well.

In a group setting, the system can be placed flat on a table, by the separate microphone, in front of the speaker.

### LA90 Desktop Loop System

This system can be used with an external desktop microphone to enhance a person's speech. It also sends signals directly to the hearing aids & gives more discretion.

#### LA90 Desktop Loop System

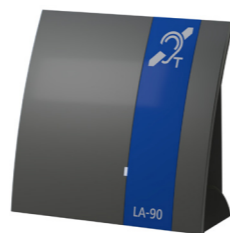

Includes: LA90 Loop Amplifier, Desktop Microphone, Handset

Order code	<b>137-102</b>	Colour	<b>Grey</b>
Price (Ex. Vat)	<b>£238.33</b>	Size	<b>200x185x70</b>
Price (Inc. Vat)	<b>£286.00</b>		

### LA90 Portable Induction Loop

A Portable loop amplifier with internal microphone, external microphone, and headphone socket (for users without the "T" Loop setting or Loop Program), volume control, replaceable NiMH battery pack, and mains power supply. The additional microphone picks up voices from both users and transmits clearly with less background noise. Battery life of approx. 6 hours from a 4-hour charge.

- Facility to fix amplifier to counter top or use Kensington lock
- Ear loop window stickers to advertise loop service

#### LA90 Portable Induction Loop

Order code	<b>137-100</b>	Colour	<b>Grey</b>
Price (Ex. Vat)	<b>£155.49</b>	Size	<b>200x185x70</b>
Price (Inc. Vat)	<b>£186.59</b>		

### LA90 Handset Kit

This adds a telephone handset to the standard LA90, enabling hearing aid and non-hearing aid users alike to benefit from easy to access amplification.

#### LA90 Handset Kit

## Our Agreement With You

### PRICES

Whilst we do our best to keep any price rises to a minimum, we reserve the right to increase our prices at any time. Should we do so, we will contact you on receipt of your order with details of the increase giving you the opportunity to cancel your order if you wish.

### Should your payment not clear, then we may, in addition to any other rights we may have:

- Suspend delivery of the product ordered or any part of them until we receive cleared funds.
- Legally recover those products already delivered to you from you or your premises at any reasonable time and retain ownership.
- Pass on to you any charges we incur in obtaining clearance of your payment.

You will not own the products until your payment for them has cleared.

### VAT

VAT is calculated at the prevailing rate at date of invoice. Should the prevailing rate of VAT change from that used in our publications, calculations will be based on new rates and charged to you accordingly.

### DELIVERY

Delivery to UK addresses normally takes 1-2 working days from the date of despatch of your order by us. It is made through Royal Mail or independent carriers. Your order may require a signature from you on receipt of your order.

If you do not receive your order within 28 days of placing your order or should your order arrive damaged, please contact us as soon as reasonably practicable. Please retain the original packaging.

Additional postage charges may be payable for deliveries to non-UK addresses; please contact us for further details.

### GUARANTEE

All our products are covered by our guarantee. You will invalidate the guarantee if:

- You use the products contrary to instructions supplied with them
- You cause any damage to the products through misuse or negligent use of them.

- If any product becomes damaged outside normal usage.
- For any consumables such as batteries.

If you wish to rely on this guarantee, we will, at our choice, either repair or replace the products or, if appropriate, any parts of them. If we are unable to carry out any of the above through no fault of our own we will refund the price you paid for the products.

In all circumstances, except for faulty goods, this guarantee shall not exceed the price you paid for the products in question. No other remedies are available.

### OUR PRODUCTS

Full descriptions of our products are given in our current catalogue or online.

The products are only suitable for the intended uses described.

As a part of our continuing programme of product development, we reserve the right to improve and update product designs.

### CANCELLATION

You may cancel your order anytime from when you place the order up to 10 working days after the date you received the goods but, to do so, you must notify us. We will respond confirming your cancellation and the date your notification was received. The date confirmed is the date the cancellation came into effect.

### UNFORESEEABLE PROBLEMS

We are not responsible for delays outside our control (for example industrial dispute, act of God, inability to obtain raw materials) if this prevents or hinders our contract with you.

### OUR AGREEMENT

An agreement is made between us once we have received and accepted your order.

Our agreement and any related matters are governed by English law. Your statutory rights are not affected. This agreement is a summary of our full Terms and Conditions of Sale and Supply; you can ask for a copy or obtain one from our website.
